Anadrol is an anabolic steroid that is used mostly by bodybuilders. It is more common among men, women should avoid using Anadrol do to its Virilization side effects. In this article, I will discuss the benefits and side effects of the Anadrol steroid and why it is popular among bodybuilders. Anadrol is a DHT-derived compound, and is 17-Alpha-Alkylated steroid, meaning that it has been

altered at the 17th carbon position to survive oral ingestion. Most oral steroids are 17aa, and this helps them make it through your liver in a useful form.
