THE ULTIMATE STARTER GUIDE FOR CHOOSING YOUR HAIR EXTENSION COURSE

HAIREXTENSIONCOURSES.COM

Hi There!

A Complete Guide To Choosing Your Hair Extension Courses

My name is Helen, and I will be your personal 1 to 1 tutor if you decide to go ahead & book your hair extension course with us.

We have put this guide together because we know how overwhelming it can seem when trying to decide what methods you want to learn.

Different names for the same technique...what's popular...easiest to fit...hardest to fit. We've got you covered in the coming pages.

Nano Ring tools

NANO RINGS

What You Need To Know

This technique requires nano tip hair, fitted with nano rings. The rings used are typically between 2 & 2.5mm in width either with a silicone lining or without. Most common are silicone lined as they offer more grip/less slippage, although the non-lined rings are *slightly* smaller.

The tips of the hair are either metal or acrylic, depending on the hair supplier, but fitted in the same way.

Nano rings are hugely popular, we currently have 1764 students enrolled on this course! Fitting time is around 2 to 2 1/2 hrs for a full head fitting.

Maintenance & refits are also very simple with no glue, mess or heat, with the added cost effective benefit of being able to re-use the hair extensions with new rings when rotating & refitting

As it doesn't use heat or glue it is a very gentle method to wear, & is very popular amongst clients that are new to extensions as a no risk option.

The type of client suited to nano rings would ideally have hair texture that is fine-medium, not naturally greasy & does not require washing too frequently. Clients with very thick hair will get a better wear from other techniques as the fitting time is dramatically increased due to the small sections & will require many packs to achieve the required look.

Suitable clients will also benefit financially, as good quality hair will be able to be re-used many times

TAPE TASTER VIDEO

TAPE EXTENSIONS

What's Included With Your Course

TAPE EXTENSIONS

What You Need To Know

Tape Extensions are one of the if not the quickest methods to install averaging 1 to 1.5 hours to fit a full head.

The maintenance and refits are also simple to administer though extra time to remove , retape and refit is necessary and often preferred to spread over two appointments.

This very popular method is also cost effective as once re taped the hair extensions can be used multiple times for re fitting providing the hair quality is good.

This is a great method to start off a career in learning to be a qualified as a hair extension technician. One of the easiest techniques to learn, master and pass.

As this method provides a very flat fitting and evenly distributed with each section it is suitable for most hair types and very popular amongst clients that are new to extensions as a no risk option.

The type of client to recommend tape extensions to would be any hair texture fine, medium or thick, not naturally greasy and doesnt require washing frequently.

A great method for short hair or clients wanting lots of volume.

A client will also benefit financially as the hair, providing good quality, can be re used once re taped many times when maintaining and refitting.

HIDDEN WEAVE TASTER VIDEO

THE HIDDEN WEAVE

What's Included With Your Course

THE HIDDEN WEAVE

What You Need To Know

This fitting technique requires weft hair. The wefts commonly used are machine wefts. This type of weft is made so the binding at the top of the weft is minimal and less bulky and noticeable after it has been attached. The wefts are attached with micro rings and sewing weave thread. Silicone line rings are most commonly used.

The Hidden Weave is the latest technique added to the sew in weave options. This new technique is the most discreet technique available without the damaging effects of tight braids. A unique fitting technique that hides the attachment between wefts of hair so hair ups are not a problem.

The fitting time averaging 2 to 2.5 hours to fit a full head. The maintenance and refits are easy to administer with no heat or glue required. The hair can be used multiple times for a cost effective fitting option. New rings and thread on each refit.

This is a great method to have as part of your portfolio to give you the latest trend but also a secure discreet result with lots of volume.

The type of client to recommend The hidden weave would be a client that requires low maintenance and would suit most hair types from medium to thick texture. Not the best choice for clients with fine hair as the volume of a double weft can be visible in finer hair types, other techniques are more suited.

The right client will also benefit financially as the hair, providing good quality, can be re used many times when maintaining and refitting.

SEW IN WEFT

What You Need To Know

This fitting technique requires weft hair. The wefts commonly used are machine wefts. This type of weft is made so the binding at the top of the weft is minimal and less bulky and noticeable after it has been attached. The wefts are attached with micro rings and sewing weave thread. Silicone line rings are most commonly used.

The sew in braidless weaves are one of the quickest and secure weaves available without the damaging effects of tight braids. The fitting time averaging 2 to 2.5 hours to fit a full head. The maintenance and refits are easy to administer with no heat or glue required.

The hair can be used multiple times for a cost effective fitting option. New rings and thread on each refit.

This is a great method to have as part of your portfolio to give a quick but secure result with lots of volume.

The type of client to recommend a sewn in weave to would be a client that requires low maintenance and would suit most hair types from medium to thick texture.

Though not the best choice for clients with fine hair as the volume of a double weft can be visible in finer hair types, other techniques are more suited.

The right client will also benefit financially as the hair, providing good quality, can be re used many times when maintaining and refitting.

MICRO RING WEFT TASTER VIDEO

MICRO RING WEFT

What's Included With Your Course

MICRO RING WEFT

What You Need To Know

This fitting technique requires weft hair. The wefts commonly used are machine wefts.

This type are made so the binding at the top of the weft is minimal and less bulky and noticeable after it has been attached. The wefts are attached with micro rings or copper tubes, silicone line rings or tubes are most commonly used.

Micro ring weft extensions are the quickest fitting weft method available. The fitting time averaging 1 to 1.5 hours to fit a full head. The maintenance and refits are easy and quick to administer with no heat or glue required.

The hair can be used multiple times for a cost effective fitting option. New rings each refit.

This is a great method to have as part of your portfolio to give a quick but effective result with lots of volume .

The type of client to recommend micro ring weft to would be a client that requires a quick fitting , low maintenance and will suit any hair type. Though not the best choice for active people or that possibly wear their hair up often and wash their hair more frequently.

The right client will also benefit financially as the hair, providing it is good quality, can be re used many times when maintaining and refitting .

MICRO RINGS TASTER VIDEO

21

MICRO RINGS

What's Included With Your Course

MICRO RINGS

What You Need To Know

This fitting technique requires stick tip/i tip hair and various possible rings to attach depending on preference.

The rings commonly used are silicone lined micro rings , unlined copper tubes , silicone lined copper tubes, euro locks or mini tubes. All can be used with stick tip/i tip hair and each type will look slightly different in length and width. The most commonly used are silicone lined micro rings 5mm.

The benefits of having alternative rings and tubes is to give more durability for certain textures of hair. Tubes will offer more grip in finer hair textures as it covers more area on the tips so less chance of slippage as well as silicone lining has to offer too .

Micro rings are one of the quickest methods to install averaging 1.5 to 2 hours to fit a full head.

The maintenance and refits are also very simple to administer with no glue, mess or heat with the cost effective benefit of being able to re use the hair extensions with new rings when refitting.

This is a great method to start off a career in learning to be a qualified hair extension technician. One of the easiest techniques to learn, master and pass.

As this method doesnt use heat or glue it is a very gentle method to wear and very popular amongst clients that are new to extensions as a no risk option.

The type of client to recommend micro rings to would be a hair texture of medium to thick, not naturally greasy that doesnt require washing frequently.

Clients with fine hair do not get the best life span as the hair can slip within these larger rings and tubes requiring frequent re fit appointments.

A client will also benefit Financially as the hair, providing good quality, can be re used many times when maintaining and refitting.

FUSION BONDS TASTER VIDEO

25

FUSION BONDS

What's Included With Your Course

FUSION BONDS

What You Need To Know

This fitting technique requires keratin tipped hair.

The keratin tips commonly used are U tips shaped like a 'U' or flat tips. Both types are made of keratin and melted to create a bond using a fusion heat iron.

The most commonly preferred are keratin tips made of Italian keratin that are made of a composition that is less stringy and hot when melted.

Pre Bonded fusion extensions were one of the first professional strand by strand fittings available to the market and still offers a very durable and popular option for wearers.

The fitting time averaging 2.5 to 3 hours to fit a full head. The maintenance and refits are easy to administer using the correct removal products. Maintenance and re fits are less frequent due to the hard wearing fitting technique. The hair can be re tipped ready to be used again for a cost effective fitting option.

This is a great method to have as part of your portfolio to give the ultimate durability with a adaptable fitting options to suit every hair texture . One of the most longstanding techniques that requires some patience to master but a must for any professional technicians portfolio .

The type of client to recommend fusion to would be a client that requires a no fuss , low maintenance fitting suitable to any hair type .

Ideal for active people that possibly wear their hair up and wash their hair more frequently. The right client will also benefit financially as the hair, providing good quality, can be re used many times when maintaining and refitting by using the re tipping technique.

COMMONLY ASKED QUESTIONS

1

HOW DOES IT WORK ONLINE?

You work at your own pace, with 1 to 1 support from your personal tutor whenever you need it. Take a sneak peek inside one of our courses [CLICK HERE](#)

2

DO I NEED TO BE A HAIRDRESSER?

In short...no. Anyone can take our courses regardless of prior background

3

ARE THE COURSES ACCREDITED?

Yes, absolutely. All our courses are fully insurance accredited. Meaning you are able to obtain full liability insurance to be able to offer your services to paying clients.

4

WHATS THE MINIMUM AGE?

You need to be 16

5

HOW DO I GET ASSESSED?

You submit pictures of a full head fitting. We tell you what pictures we need. You complete your assessment on the training head provided, with the hair we provide.

COMMONLY ASKED QUESTIONS CONTINUED...

6

HOW LONG DOES IT TAKE?

This depends on how many methods you are learning, how much time you have available & how well you understand your course materials

7

IS THERE A TIME LIMIT?

No, you work at your own pace and submit when you feel ready.

8

HOW LONG DO I HAVE ACCESS TO MY COURSES FOR?

Forever! We are different....we don't just give you 3 or 6 months access. Everything is yours...to keep...forever!

9

CAN I DO THIS ON MY PHONE?

Yes. You can use ANY device to access our courses

10

WHAT IF I DON'T PASS FIRST TIME?

Your tutor works with you to help you reach the required standard. You can re-submit as many times as you like...& there is NEVER any extra charge

Wondering if an online course is really as good as a face to face course?? 🤔

🌟🌟🌟🌟🌟 5 star review from Lucy Gainey: Amazing....

I have been to 1 day courses before and always found them to be a waste of money as when I've gone home to practice I've got unanswered questions and been stuck. I tried this online course with the hope that it wouldn't be a massive struggle for me and that I wouldn't waste my money... but WOW! Best course I've ever done! Could easily ask questions through the WhatsApp and got replies within minutes, could send pictures of my work to check it was okay before sending off and the videos were the perfect amount of time that you don't get bored watching them. They send you a copy of ur certificate through the post, provide you with a good website to buy the hair and where to get insurance! Really enjoyed this course and completed it within a few days. Can't wait to start practising on people now! Don't hesitate and go for it because you won't be disappointed
