

# Iron and Sulfur Removal

Penguin Water  
**ADVANCED OXIDATION FILTER**

Experience cutting-edge water treatment technology with Penguin Water Systems' Advanced Oxidation System

Designed to deliver unparalleled performance, our system effectively targets and eliminates impurities like iron, sulfur, and manganese, ensuring your water is clean and safe for your family's everyday use.

The system includes a dedicated solution storage tank and a high-precision metering device.

This combination guarantees accurate dosing, contributing to the overall effectiveness of the treatment process.

Features a state-of-the-art proportional injection system for hydrogen peroxide.

This innovative approach ensures precise water dosing, optimizing the treatment process's efficiency and minimizing waste.

Iron, sulfur, and manganese are no match for our system's advanced catalytic carbon filtration media, designed with a self-cleaning feature, ensuring that the filtration media remains in optimal condition with minimal effort on your part.

This high-performance filtration technology captures and eliminates these impurities, leaving you with cleaner, better-tasting water.

**DROP** MODEL AVAILABLE!

Removes Iron, Sulfur, Manganese, and other contaminants when applied correctly; the only way to guarantee the system will work properly is to purchase a comprehensive water test. **Run, don't walk to speak with your Penguin Dealer today, get your water tested, and learn more about our quality systems.**
