

Penguin Water BACK WASHING FILTERS

**Residential and
Light Commercial Models**

Filter Solutions

Our filters offer a range of options to fit your specific needs and are designed to ensure that your water is clean, pure, and refreshing. With a 10-year warranty on valves and electronics, you can trust that our filters are built to last.

As water flows through the filter, contaminants are trapped in the media bed. The filter automatically initiates a backwash cycle, reversing the flow of water and dislodging the trapped contaminants. The waste is then drained, and the filter resumes its regular operation. This process occurs without any intervention from the user, ensuring low maintenance and hassle-free operation.

AVAILABLE MEDIAS

- | | |
|--------------------|---------------------------|
| 1 GAC | 2 FilterAg Plus |
| 3 KDF-55 | 4 Catalytic Carbon |
| 5 Calcite | 6 MagOx |
| 7 Greensand | 8 Bone Char |

We understand that every water supply is different, we recommend speaking with a Penguin Water specialist before applying one of our filters. Our team is knowledgeable about our products and can help you choose the best filter for your needs.
