

# DROP WATER MANAGEMENT AND FLOOD PROTECTION SYSTEM

More than a  
**Water Softener**

**The DROP Water Management System** is a private ecosystem for your water supply. Its leak detection and valve control give you peace of mind, and the intuitive user interface lets you stay on top of your water usage anywhere in the world.

1

**DROP App to Control System From Anywhere**

2

**Independent Battery Failsafe**

3

**Text Messages for Low-Salt and Other Events**

4

**10 Year Limited Warranty**

## Smart Hub

**The Hub manages all the DROP devices through DROP Link**, a low-frequency mesh-style radio. The Hub allows the system to communicate locally to the DROP app on your phone or tablet or join your local Wi-Fi to enable remote operation. Having only one connection to the local Wi-Fi makes adding devices much simpler than connecting each product directly to the cloud.

## DROP Leak Detector

Never worry again about returning home to frozen pipes, comically high water bills or a pond where your kitchen used to be. **DROP Leak Detectors** provide critical data to the DROP water management system to help protect your home from water damage. DROP Leak Detectors sense water in the area and continuously monitor the temperature. The leak detectors can be independently configured to automatically shut off the home water supply when the temperature falls below a user-designated level or provide notification of the condition.

## DROP Pump Controller

When installed with an optional meter, the DROP Pump Controller monitors your water flow and will alert you to excessive usage, helping to prevent or reduce water damage in the event of a burst pipe or appliance leak. The DROP Pump Controller monitors your water usage and pump diagnostics, providing your home with additional protection.

## DROP Home Protection Valve

If you currently do not require or own a water treatment system yet desire to upgrade to DROP monitoring capabilities, the Home Protection Valve offers a fitting solution. This add-on valve offers all the monitoring and shut-off features of the DROP Softener in one comprehensive package.
