ml Testosterone cypionate U.S.P. (10ml VIAL). Chemical names. The usual dosage is in the range of
200-600 mg per week, taken in cycles 6 to 12 weeks in length. This level is sufficient for most users to
notice exceptional gains in muscle size and strength. This exam tortured me a bit, i had just been
transferred to another clinic and they requested that exam, I had to drink a not pleasant liquid, it was a
full jar and right in the last glass, I vomited everything, I cried to the frustration and as always Joselito
present there supporting me and kira, of course. [go now](#)
