Airpura Limited Warranty
5 years on parts and 10 years labor
See www.airpura.com for details

Thank You for choosing an Airpura High Efficiency Air Purifier To bring you the benefits of clean indoor air

To Begin Using Your Airpura...
- Inspect the exterior of your Airpura to verify there is no damage from shipping. If any damage is noted please follow the instructions in the Airpura returns policy.
- Wipe the unit with a damp cloth to remove any dust from packaging
- Plug the unit into a regular grounded 110 volt outlet
- Turn on the unit to MAX and allow it to run for a few minutes
- Set the variable speed control to the level you wish
- The most efficient way to use your Airpura for regular air quality maintenance is to run it at a low speed 24 hours a day 7 days a week

Feel the difference breathing clean air makes to your health

To close the filter chamber
Replace the gasket
Position the indentation in the cover into the center of the HepaBarrier
Replace the 4 screws and tighten
Turn the Airpura back onto its casters

Airpura Limited Warranty
5 years on parts and 10 years labor

Filter Maintenance and Replacement

The TarBarrier
- Can be vacuumed from the exterior of the unit once a month or more often.
- Should be replaced between 1 to 3 months of use

To vacuum the TarBarrier
- Use the brush attachment on your vacuum cleaner
- Vacuum slowly around the mesh surface of the filter chamber

The Activated Carbon Filter
- Should be changed as needed in heavy applications and at least every 24 months in normal use.

The HEPA-Barrier
- Should be replaced at least every 12 months of normal use

To open the filter chamber

1. Turn over the Airpura
2. Remove the 4 retaining screws
3. Take off the cover
4. Remove the gasket
5. Position the pTarBarrier inside the filter chamber
6. Place a felt gasket at the bottom of the filter chamber
7. Unfold the filter slider (Supplied with replacement filters or on request Part#6F 001)
8. Roll it into a spiral
9. Insert the tube into the filter chamber inside the pre-filter
10. Let the spiral open to fill the opening
11. Open the top of the spiral to make a slight funnel
12. Insert the carbon canister into the funnel and hold it straight
13. Let the canister slide down the filter slider
14. Pull the filter slider up out of the cavity using both hands and let the canister slide to the bottom of the cavity
15. Remove the filter slider and fold it for further use
16. Place a felt gasket at the bottom of the filter chamber
17. Position the pTarBarrier inside the filter chamber
18. Slide in the HepaBarrier

See over for closing the filter chamber
