SAFETY INSTRUCTIONS

When using electrical appliances, basic safety precautions should always be followed to reduce the risk of fire, electric shock, and injury to persons. These precautions include:

1. Read all instructions before using the appliance.
2. To avoid fire or shock hazard, plug the appliance directly into a 120V AC electrical outlet.
3. If the filter is covered by a bag when shipped, remove the plastic bag before use.
4. Do not use outdoors.
5. To protect against electrical hazards, DO NOT use the appliance with any solid-state speed controller (such as in a bedroom), select LOW setting.
6. Close supervision is necessary when any appliance is used by or near children, or disabled persons.
7. DO NOT use this appliance with any solid-state speed controller.
8. DO NOT use this appliance with any solid-state speed controller (such as in a bedroom), select LOW setting.
9. Do not operate any appliance with a damaged cord or plug. If the motor fan fails to operate or the unit has been dropped or damaged in any manner, return the unit to the manufacturer for examination and/or repair.
10. Use appliance only for intended household use as recommended by the manufacturer.
11. DO NOT use near water.
12. DO NOT discard filter. It must be replaced every 500 hours of operation (such as in a bedroom), select LOW setting.
13. Keep unit away from heated surfaces and open flames.
14. DO NOT use this appliance with any solid-state speed controller.
15. DO NOT place anything on top of unit.
16. HEPA air cleaner removes up to 99.97% of airborne allergens as small as 0.3 microns, pollen, pet hair, bacteria, mold spores, dust, smoke, and odors from the air passing through the filter.
17. The ionizer in this appliance produces less ozone than colorless, odorless, and completely harmless.
18. The ionizer in this appliance produces less ozone than colorless, odorless, and completely harmless.
19. WARNING: To reduce the risk of fire or electric shock, DO NOT ALTER THE PLUG IN ANY WAY.
20. WARNING: To reduce the risk of fire or electric shock, DO NOT ALTER THE PLUG IN ANY WAY.

IMPORTANT SAFEGUARDS FEATURES

When using electrical appliances, basic safety precautions should always be followed to reduce the risk of fire, electric shock, and injury to persons. These precautions include:

20. WARNING: To reduce the risk of fire or electric shock, DO NOT ALTER THE PLUG IN ANY WAY.

OPERATING INSTRUCTIONS

1. Remove all plastic bags from filters before use.
2. Select the operating speed of your air cleaner (see Fig. 1). 1) turn on the control knob to the appropriate setting. 2) In re-circulation mode, turn the ionizer off. 3) press the “ Ionize” button to turn on the ionizer. 4) To turn on the ionizer, press the “ Ionize” button. 5) press the “ Ionize” button to turn off the ionizer.

REPLACING THE FILTER

1. TEST the air inlet grill and ensure the frame fits. 2) do not force frame into the air filter outlet. 3) press the “ Ionize” button to turn off the ionizer. 4) DO NOT attempt to clean the air filter. 5) To maintain the life of your air cleaner, replace the HEPA filter every 500 hours of operation (such as in a bedroom), select LOW setting.

BEFORE USE

1. Carefully unpack your air cleaner. 2) remove the filters from the air cleaner unit. 3) if the filter is discernible by using a flashlight, examine the filters before use. 4) press the “ Ionize” button to turn off the ionizer. 5) press the “ Ionize” button to turn off the ionizer. 6) press the “ Ionize” button to turn off the ionizer. 7) press the “ Ionize” button to turn off the ionizer.

FEATURES

GET TO KNOW YOUR AIR CLEANER

Your true HEPA air cleaner removes up to 99.97% of airborne allergens as small as 0.3 microns, pollen, pet hair, bacteria, mold spores, dust, smoke, and odors from the air passing through the filter.

IONIZER

This appliance has an optional ionizer feature, which helps to keep the room clean. It is designed to help remove allergens and other airborne particles by creating negative ions in the air.

HOW ARE IONS CREATED?

Negative ions help by attracting dust to the surface of the filter. This process is repeated until the ionizer is turned off.

What are ions?

Ions are electrically charged particles. They consist of very small solid particles in the air. These particles include dust, pollen, smoke, and other small particles that are too small to be seen by the naked eye. When these particles are charged, they are attracted to each other and become ions.

What are the benefits of using ions?

Ions can help to improve indoor air quality by attracting dust and other particles to the surface of the filter. This process helps to remove allergens and other airborne particles from the air. Ions can also help to reduce the number of allergens in the air, making the air cleaner and more comfortable for people who are allergic to these substances.

CAUTION:

1. DO NOT operate your air cleaner with the filter removed.
2. DO NOT use this appliance with any solid-state speed controller.
3. If the filter is discernible by using a flashlight, examine the filters before use.
4. Verify that the filters are clean and dust-free. If not, replace the filters.
5. When replacing the filters, be sure to replace them in the correct order. 6) DO NOT attempt to clean the air filter.
