

Manual 18° bed

selé

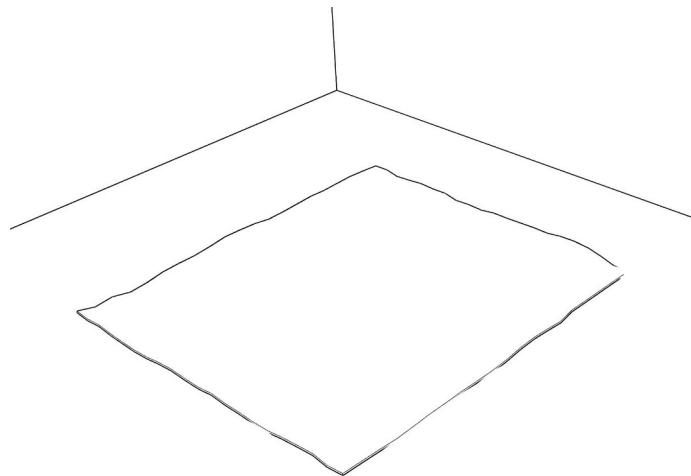

In addition to the steps below, we would like to give you some tips for best results and to prevent damage:

1. Use a rug to prevent scratches.
2. Do not tighten the bolts too hard. Apply some pressure, but do not apply force.
3. Tighten the parts in steps 6 and 7 about 80% first.
4. Next, check that the corners connect properly (top and bottom).
5. If a corner does not fit properly, it is probably because some parts have been tightened more firmly than others.
6. Adjust these parts by loosening and/or tightening them more firmly until the corners fit well and are 100% tightened.
7. Perform step 12 with 2 people (turn over bed).
8. Not satisfied? Feel free to contact us at support@studiosele.com, including your telephone number, and we will call you back as soon as possible.
