COPPER MALLET

DEFINING FEATURES

- Manufactured from 99.9% Pure Electrolytic Copper rod
- Textured grip handle

MADE IN

BRITAIN

FIRST FOR SAFETY

ADDITIONAL FEATURES

- 1 **99.9% copper head**
manufactured from pure electrolytic copper rod, providing a high impact blow that is very safe to use against metal surfaces - minimising sparking and rebound risks, with less chance of damaging metal workpieces.
- 2 **The nylon plastic handle is corrosion resistant,**
non-conductive, vibration dampening and lightweight, adding to the usability and versatility of the hammer.
- 3 **Textured grip**
for additional safety.

ACCESSORIES

TS-3025SLC

LE-2086B / LE-2086N
