STAR★LITE TACTICAL FLASHLIGHT

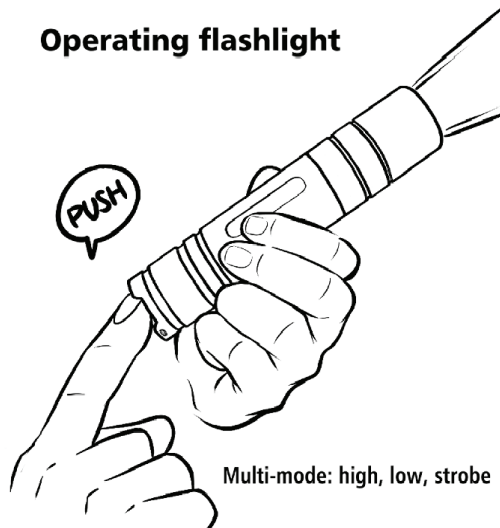

OPERATING MANUAL

Contents and specifications

- 500 lumens
- 100m beam distance
- 2.5 hours runtime
- IP67 dust and water resistance

Operating flashlight

Multi-mode: high, low, strobe

IMPORTANT WARNINGS

CAUTION: The Star★Lite Tactical Flashlight features a powerful beam that may cause the device to become uncomfortably warm when operated for an extended duration. The increased temperature does not present a burn hazard, and the device is safe to use for short periods of time.

BATTERY

WARNING: FIRE, EXPLOSION, BURN HAZARD

DO NOT: misuse, short-circuit, improperly store or discard, disassemble, or heat above 212°F (100°C).

Keep away from children.

USE ONLY: qualified 3.7V 18650 or 3V CR123A batteries.

This product is not designed to use rechargeable CR123 cells.

The Star★Lite Tactical Flashlight will function effectively when installed with the Star★Tactical 18650 USB Rechargeable 3.7V Protected Lithium-ion 3500mAh Battery.

LED

CAUTION: LED radiation (RG-2)

Do not stare into beam.

May be harmful to eyes.

IEC 62471:2006

CONTENTS

- Star★Lite Tactical Flashlight
- 18650 USB rechargeable 3.7V lithium-ion 3500mAh battery
- 6-inch micro USB-A cable

SPECIFICATIONS

- 500 lumens
- 100m beam distance
- White beam color
- 2.5 hours runtime*
- IP67 dust and water resistance
- Machined aluminum alloy
- 73g/2.57oz (without battery)
- Multi-mode: high-low-strobe

*Runtime is defined as the amount of time between the initial switching of the flashlight and the decrease of brightness to 10% of the rated output on new batteries.

BATTERY INSTALLATION/REMOVAL

Uses one 18650 battery or two CR123 batteries. Unscrew the tailcap and remove depleted battery(s), insert fresh battery(s) positive end first, replace and tighten tailcap.

18650 USB BATTERY CHARGING

The Star★Lite Tactical Flashlight may ship with an 18650 USB rechargeable lithium-ion battery with integrated charge port. The battery should be fully charged before its first use. To charge the 18650 USB battery, insert the micro-USB plug into the connector near the positive end of the battery. The battery may be left plugged into a micro-USB cable continuously; there is no danger of overcharge.

LED charge indicators

- Red: charging
- Blue: charged

GENERAL OPERATION

The Star★Lite Tactical Flashlight features multi-mode operation capable of switching between HIGH, LOW, and STROBE beams. To turn on the flashlight, simply press the push-button switch at the end of the tailcap until it clicks.

When the flashlight is turned on, change modes by lightly pressing/tapping the push-button switch. The mode can also be changed by double-clicking quickly within 0.5 seconds. The modes cycle in order from HIGH to LOW to STROBE.

The flashlight always defaults to HIGH after being turned off for longer than 0.5 seconds.

MAINTENANCE

Use a soft cloth and mild detergent to clean the glass lens and keep it free of dirt and grime.

Note: Always avoid aggressive cleaning solutions.
