Download the app

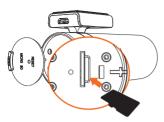

https://l.ead.me/bcpE4P

Download the Road Angel App from the Google Playstore or Apple Appstore using the above QR code. Alternatively navigate to your preferred Appstore and search for Road Angel Halo. You need to download the Road Angel App to use the Dash Camera.

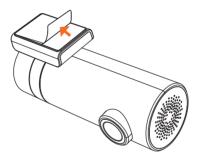

Getting Started 1

- Power off you car engine.
- Insert the SD Card into the SD Slot
- The Halo Drive supports up to 128Gb Class 10 SD Cards.
- For 64GB/128GB SD cards, please beforehand format through Halo App or else the card can't be read properly.
- Mount the Halo Drive to your windscreen by peeling off the protective film from the 3M Sticky Pad and place behind the rear-view mirror.

 Following the wire-running diagram on the previous page plug the USB adapter into the cars power outlet.

Do not remove SD Cards when the Camera is on. The SD Card will need formatting with the device before first use.

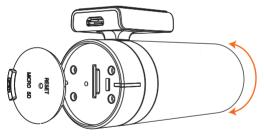

Ensure the Halo Drive does not obstruct the view of the driver.

Getting Started²

- Plug the USB cable into the back of the power adapter and the micro USB into the Halo Drive.
- Turn on the car's ignition and check everything is working correctly. Halo Drive will automatically boot up with a welcoming voice alert.

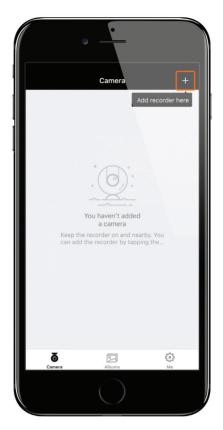

7. Adjust the angle of the lens by rotating the body of the Halo Drive.

A constant/permanent power source is required for parking mode to operate correctly.

Hardwiring kits and accessories are available separately.

ROAD ANGEL™

Wi-Fi Setup

Launch the App. Press the '+' icon in the top right corner. Then follow the instructions that will be shown in the App on how to connect the device via Wi-Fi. Once connected successfully you may return to the Halo App.

• The default Wi-Fi password is set to '1234567890'.

Live Preview

To preview the dash cams currently recording footage, select the Camera tab at the bottom of the app and press the Play icon on the screen. This will display a real time view of the live dash cam footage.

Here you will see 3 icons that allow you to download, take a picture or enter full screen mode. The download tab lets you download an image taken or download footage, this will take you to the download window ready to create a clip.

Photo Editing

After you have selected the photo from the Album page you have several options.

Top right button saves photos to the phones photo album.

Bottom left magic wand opens the photo editing mode. Middle trash can deletes the photo and bottom right allows you to share the photo.

The photo editing screen allows you to add text captions, video frames, contrast settings and choose from 17 photo filters.

When you are finished simply save your file.

Video Editing 1

After you have selected a video from the Album page you have several options. The bottom controls change playback options. The top right buttons allow you to share the video and open the side menu.

From the side menu you can delete the video, 'Save' the video to your phones photo/video album or open the 'Video Editing' mode.

Video Editing²

The video editing screen lets you crop the length of the selected video and choose video quality. Once done press the 'Next' button at the bottom to continue.

From the next 'Video
Editing' screen you can
change the sound options
for the video. You can
toggle the sound on and
off or you can choose from
7 music tracks.

When you are finished simply 'Save' your file.

Video Playback

To playback footage, slide the scroll bar which will show you a thumbnail of the moment about to be viewed along with the date and time

You can rotate your phone to enhace the experince and see more options. You will also be able to download footage. You can also view Live preview, photo viewing or video viewing here.

Download Footage 1

When in the Lanscape Video Playback mode, select the Download icon on the right of the screen which will take you to the download screen.

To create a clip of what has been recorded, slide the viewing bar to the left to scroll backwards in time and to the left to go forwards. A thumbnail of what moment you are on with a date and time will be displayed to help select the right clip.

Press 'Start Download' on the right of the thumbnail of the footage, the footage will then begin playing back what is being downloaded in realtime.

Download Footage²

When you are happy with the length of the video clip, press 'complete download'. While downloading, you may not have connection to the internet.

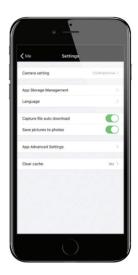

The screen will now show you a thumbnail of the downloaded video clip, giving you the option to 'share' or 'delete' the video clip, the video clip is stored in the app album tab.

Camera Settings

When connected to the camera, press the Settings icon in the bottom right to access the general settings of the dash cam.

Advanced Camera Settings

More settings can be found within the Advance camera settings

Parking Mode

The Halo Drives's parking mode records video footage even when your vehicle is parked. The parking mode feature has several settings that can be changed.

In the 'Advanced Camera Settings' screen you can adjust the Parking Mode G-Sensor sensitivity, set what type of video format you want Parking Mode to be recorded in and set the duration of the Parking Mode recording limit.

The Halo Drive requires a constant power source for parking mode function.

Hardwiring Kits can be purchased separately.

FCC STATEMENT This device complies with Part 15 of the FCC Rules.
Operation is subject to the following 2 conditions: (1) This device may not cause harmful interference, and (2) Must accept any interference received, Incl. interference that may cause undesired operation.

WARNING Changes or modifications not expressly approved by the partly responsible for compliance could void the user's authority to operate the equipment.

NOTE This equipment has been tested and found to comply with the limits for a Class B digital device. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will occur in a particular installation. If this equipment does cause harmful interference to radio or TV reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures: (1) Reorient or relocate the receiving antenna. (2) increase the separation between the equipment and receiver. (3) Connect the equipment into an outlet on a circuit different from that which the receiver is connected. (4) Consult the dealer or an experienced radio/TV technician for help.

FAQ's

VIDEO RECORDING

- Q1: Shall I keep the Halo Drive connected with my Smart phone when it is working?
- Al: The Halo Drive starts to record video automatically when the car is started without needing to connect to your phone. However, if they are connected, you can preview, download and playback the videos from the Halo App
- Q2: Why are some of the Halo Drive video recordings missing?
- A2: Make sure the Halo App and the Halo Drive firmware's are the latest version. If there is a 'Storage exception' notification, this means the SD card is corrupted and needs to be replaced.
- Q3: Why is the image unclear on my Smart phone?
- A3: The video downloaded to your Smart phone is compressed, you can review HD recordings via a PC in MP4 format.

WI-FI AND APP CONNECTIVITY

- Q1: How do I change the Wi-Fi name and password of the Halo Drive?
- Al: Make sure your Halo Drive is connected to the App. Then go to Me > Settings > Camera Settings > Camera Name (changes your Wi-Fi name), Camera Password (changes your Wi-Fi password).
- Q2. Why is my Wi-Fi always disconnected?
- A2: Go to Settings > Wi-Fi > Menu > Advanced > Disable 'Scanning always available'. If 'Scanning always available' is checked, make sure your Smart phone is near the Halo Drive.
- Q3: After connection to the Halo Drive Wi-Fi, why can't my Android Smart phone access it's Mobile Data?
- A3: Due to the settings of Android Smart phones, Mobile Data is no longer available when it's connected to the Wi-Fi of the Halo Drive.
