**Marketing Assistance Needed  
November 12<sup>th</sup>, 2019**

M.E. Taylor Engineering, Inc. / SEMicro Division has an immediate part-time opening for a Sales / Marketing Professional. We are looking for an independent contractor as opposed to a company employee, if possible. Compensation is flexible and will be determined by the agreed-upon structure of employment.

We are a small company with limited experience in sales and marketing; innovation and creativity are our strong points. The ideal candidate to assist us would have previous sales experience. It would also be helpful to have experience with YouTube as we would like to submit promotional videos that showcase our products. This may be a good fit for a marketing student or a recent retiree who is looking for part-time work. The job could be done remotely or from home. It would be quite helpful for us to hire a quick learner who is self-motivated. It is estimated that 10 to 20 hours per week will be required. Work hours are flexible.

As a company, M.E. Taylor Engineering, Inc. has been in business for nearly 40 years. We are the home of the P.A.T.T.I. - the Pneumatic Adhesion Tensile Testing Instrument. Learn more about us and our product line on our website: [www.semicro.org](http://www.semicro.org).
