

PB 900 GT

Glide Through Pressure Pot System

With the PB900 GT glide through pressure pot sand blasting system you are not limited to size of material. Oversized panels of any material can be etched by sliding through the slot at the back of the cabinet. The slot has a rubber flange lining to keep the abrasive in the cabinet.

INSIDE WORK AREA

91.5cm x 91.5cm

VERTICLE & HORIZONTAL SLOTS

Dual load bearing arms and internal roller system

14 & 11 GAUGE STEEL CABINET CONSTRUCTION

AIR REGULATOR

TUNGSTEN CARBIDE NOZZLE

PB 2648 VX

The New Super Grit System

Its huge viewing window and stellar lighting system makes the blasting of large projects a piece of cake. An adjustable blasting shelf makes it easy to have multiple pieces in the cabinet. Full front door opens to allow bigger pieces of glass to be easily inserted and removed. The blasting slot with padded armrest allows extraordinary range of movement. New, diaphragm-free foot pedal for superior grit stream.

INSIDE WORK AREA

61cm D x 120.6cm W x 101.6cm H
