

R20 *trolleys and roll containers*

Highline

Roll container type R20 is available in two different configurations: - with 3 drawers (model R20-1) - with 1 drawer + 1 filing drawer (model R20-2). Both roll container models are equipped with a central locking system. The edges are available either chromed or varnished. Standardly, the castors are suitable for hard floors (e.g. wooden and parquet floors).
