How To Install Artificial Grass

a step-by-step guide

1  **Remove Existing Sod**
Remove 2-4 inches of your existing lawn and dirt.

2  **Add The Base**
Evenly spread 2-3 inches of road base over the area.

3  **Compact The Base**
Lightly wet the road base and go over it with a plate compactor.

4  **Lay The Weed Barrier**
Lay the weed barrier to prevent vegetation from sprouting through the turf.

How To Install Artificial Grass

a step-by-step guide

5

Roll Out The Turf

Roll out the artificial grass and position where needed.

6

Cut To Size

Cut the artificial grass to fit the area.

7

Secure The Seams

Correctly fit the seams and join them with seaming tape and glue.

8

Secure The Turf

Stretch the artificial grass and then place galvanized nails every six inches along the perimeter.

a step-by-step guide

9

Spread The Infill

If needed, use a drop spreader to evenly disperse the proper amount of infill.

10

Broom The Infill And Turf

Use a power or push broom to brush the artificial grass.

11

Enjoy Your Artificial Grass

Kick back, relax, and enjoy your brand new Artificial Grass!

You won't have to worry about mowing your lawn anymore.

How To Install Artificial Grass

a step-by-step guide

Tips

- Prior to installation lay artificial grass out under the sun for at least 1-2 hours to allow artificial grass to acclimate. This will make the backing less stiff and the artificial grass easier to be swept.
- Always stretch and install artificial grass taut.
- Do not overlap seams.
- Lay all rolls in the same direction so the blades of grass all point in the same direction.
- Never drive nails into base too far because this will create a noticeable dip.
- Make sure base surface is as level and as smooth as possible.
- Create a slight grade for optimal drainage.
- In some cases the infill is optional. Never use regular sand for infill. Use only manufacturer recommended infill material.
- Optional: Fit a treated wooden frame around the border of the area to be covered with artificial grass.
