

Using Secure Clips

Secure Clips provide a low cost, easy to install method for providing strong anchorage points on Secure Covers.

Secure Clips have teeth which grip and lock onto the Secure Cover material.

Installing Secure Clips

Line up Secure Clip with the edge of the Secure Cover and push teeth through.

Close clip, squeezing firmly, making sure all teeth are engaged. The clip can be squeezed with pliers, tapped with a mallet or gently trodden on until you can feel the teeth snap into place.

Spacing

When covering big bale stacks attach Secure Gravel Bags to Secure Covers using Secure Clips every 5-10 metres.

When used with Secure Covers to hold down plastic sheets on straw stacks fix Secure Clips and Secure Gravel Bags every metre.

Attaching Secure Gravel Bags

Attach the handle of the gravel bag to the clip using a cable tie. The other end of the gravel bag can be attached by pushing a cable tie through the material.

Other Uses

Secure Clips can also be used as grommets to fix Secure Covers to wooden battens or to hang Secure Covers from tensioned cables.

Secure Clips are suitable for use on tarpaulins or other sheet material.
