Triumph on the Frontlines: RTS Tactical Achieves ISO and BA Certification

RTS Tactical is a body armor and tactical gear manufacturer based out of Miami, FL. Our comprehensive approach to manufacturing integrates innovative design conception, meticulous product development, skillful craftsmanship, and precise manufacturing processes. In our continued pursuit of excellence, we are proud to announce a significant milestone in our journey - RTS Tactical has successfully achieved ISO and BA certification! As of December 12, 2023, our Quality Management System has been certified by Perry Johnson Registrars, Inc as in conformance with ISO 9001:2015 and BA 9000:2016 standards.

ISO 9001 is a globally recognized standard for quality management. Certification means an organization has proved their ability to consistently meet customer expectations, improve performance, and demonstrate their dedication to quality. Achieving this certification emphasizes RTS Tactical's unwavering commitment to quality management in adherence to international standards.

BA 9000 is the application of ISO 9001 specific to ballistic-resistant body armor manufacturing, which is a more extensive standard resulting from a collaboration involving the National Institute of Justice (NIJ). As stated in the US Department of Justice website "*Certification to BA 9000 means that an officer can have a higher degree of confidence that armor purchased from a manufacturer who has a BA 9000 accredited manufacturing facility will be constructed and perform similarly to the armor originally tested and found to comply with NIJ Standard 0101.06 and NIJ Compliance Testing Program requirements.*" Gaining this prestigious recognition places RTS Tactical among the elite few organizations in the US that has been certified under this esteemed standard.

For RTS Tactical, this is not just a certification; it's also a battle won, a testament to our mission to design and manufacture best-in-class tactical gear for our fearless men and women in uniform. Embarking on this certification journey was not just a strategic decision; it was to underscore the integrity of our company's Quality Policy to fulfill and exceed our customers' expectations by continuously improving our services and internal processes.

Our fearless leadership team has relentlessly worked towards meeting and exceeding the rigorous requirements of ISO. In the trenches of everyday operations, every single employee of RTS Tactical displayed commitment, hard work, and passion for excellence. We owe this achievement to the collective efforts of each and everyone in the company. We are extremely proud to say that our successful certification is the mark of a battle-hardened organization ready to face any challenge with discipline, precision, and unwavering commitment to excellence.

As an ISO-certified manufacturer, RTS Tactical will continue to design and develop body armor and tactical gear that went through a rigorous and extensive design and manufacturing process following our Quality Management System, to consistently ensure that all required regulatory and field testing standards are met above and beyond industry standards.
