

## ADVANTAGES

Dyneema® rope:  
High strength,  
extremely strong  
and breakage  
resistant

230° rotating cutting head for an easy cutting of branches in every direction

High corrosion resistant Bahco Pradines cutting head, easily penetrates wood up to 32mm.

Telescopic shaft length adjustable from 2.3m to 4.0m with easy and reliable locking system.

Soft anti-slip sleeve providing better comfort.

Comfortable slicing upper handle to reach maximum cutting power

Double function of the end-cap:

- Additional lower handle to reach maximum height.
- Shock absorber avoiding damage when hitting the ground unexpectedly.

## TELESCOPIC TOP PRUNER

The extremely well balanced Bahco telescopic top pruner ATP-230-410 easily cuts off tall branches and overgrown trees and allows accessibility to tree crowns and dense bushes. It enables overhead trimming without the need of a ladder.

The comfortable lightweight aluminum pole can be endlessly adjusted from 2.3m to 4.0m, which brings a reach up to 6 meters. The lever action slicing system reduces the effort required which makes cutting easier.

**EXTREMELY BALANCED**  
TOP PRUNER EVEN AT FULL EXTENSION
