BLACK CHERRY PUNCH

Blackberry Kush x Cherry Pie

This Indica of striking purple tones, crossing of Blackberry Kush and Cherry Pie, is one of the plants that are richest in terpenes. Its flavor is fruity, with earthy nuances at the beginning and a sweet floral background. It has a penetrating aroma of wood with a hint of blueberry pie. Its intense cerebral effect, of 25% THC, relaxes the body and calms the pain while keeping the mind awake and focused. It is perfect to smoke at home on a relaxation day for its sedative and clean effect, preferably in the afternoon to maximize its full potential.

TAHOE CURE

OG Kush x Grape Stomper BX2

This variety of 90% Indica dominance is the cure for any muscular ailment, chronic pain, stress, insomnia or lack of appetite among others. From the first puff this powerful strain fills the mind with joy and gives the body a sense of calm, relieving pain and anxiety. It is preferable to smoke it at night because of its strong sedative effect that induces sleep and laziness. Its flavor is fruity, a little spicy and with a lasting nuance of Skunk. It has an aroma of grape and pine with a very penetrating and spicy touch.

SUNSET SHERBET

Girl Scout Cookies

The complex aromatic profile of this strain includes citrus fruits, berries and a sweet caramel aroma inherited from its mother, the GSC. Its powerful and lasting effect elevates the mood, eliminates tensions and leads to a state of total mental and physical relaxation. It can be used in low doses for creative activities since it stimulates the mind and improves concentration. Ideal to de-stress after a hard day's work or enjoy an artistic or interpersonal experience. Not very difficult to grow, outdoors be careful with mushrooms and temperature changes.

PURPLE URKLE

Mendocino Purps

Californian variety of Indica predominance with a distinctive purple color. It has a sweet flavor reminiscent of tropical fruits and ripe grapes and a fruity Skunk aroma. Its intense Indica effect relaxes the body and mind and helps to effectively combat insomnia, anxiety and muscle pain and to improve one's mood which makes this herb a great antidepressant. It is advisable to moderate the dose for novice smokers since its high content in THC can leave you prostrate on the couch in just a couple of puffs, so it is preferable to save it for the night.

DOUBLE OG HAZE

Big Bud x Afgoo x SFV OG

Not recommended for beginners because of its high level of THC that will leave you completely KO. A sensation of deep relaxation progressively extends from the head to the extremities and, as the body becomes accustomed, you also might notice a certain alteration of perception. This variety goes very well with a quiet afternoon of laughter in the company of friends. Its therapeutic effects are known to relieve stress and anxiety, as well as chronic or temporary pain. It has a mild citrus aroma, a bit sweet and with a touch of diesel and Skunk.

ROMULAN

Unknown

It takes its name from the alien race of the Star Trek saga. Romulan is a powerful Indica, although it has an intense cerebral effect thanks to its Sativa part. It is known for its numerous medicinal uses and for its incredible relaxing effect, also appreciated by consumers of recreational cannabis. It provokes a powerful euphoria and then plunges the consumer into a deep calm, with interesting introspective effects. The taste is sweet with touches of pine and spicy. The plant presents purple and reddish tones at the end of flowering.

COOKIES USA

Durban Poison x OG Kush

This Californian genetics has become popular among growers around the world thanks to its short flowering, ease of cultivation, its sweet fruity and appetizing taste, as well as its strong physical effect, with 24% THC. The effect it produces is very relaxing and long lasting, leaving the body in deep relaxation and releasing tensions while the mind flows towards the cosmic consciousness. At the end of the flowering, the plant acquires very dark (almost black) purple tones. Highly recommended for extractions due to its abundant resin production.

DO-SI-DOS

Face Off OG x Girl Scout Cookies

It takes its name from the famous cookies of the American Girls Scouts and belongs to the Cookies family. Its buds have the sweet and exotic fruits taste of Cookies with the creamy touch of OG and with dark purple tones. Its aroma is penetrating, sweet and earthy with floral nuances. With a THC level that's higher than 25%, its euphoric high is fast and intense and progressively transforms into a state of relaxation and introspection. Medically, it is highly recommended for people with depression and insomnia due to its lasting sedative effect.

GORILA

Chem Sis x Sour Dubb

This American genetics has one of the highest THC levels on the market. Its resin production is so big that it soaks even the leaves and stems, making it perfect for extractions. Its smoke has an exquisite flavor with earthy and sweet nuances, a little acid and with a touch of pine inherited from its progenitors. It has an intense aroma of pine wood and bitter lemon. Its combined effect between Indica and Sativa causes a cheerful euphoria followed by a pleasant relaxation, allowing the body to float while the mind remains clear.

WATERMELON ZKITTLEZ

Watermelon Zum Zum #3 x OG Eddy

This Sativa is very appreciated for its unusual sweet and juicy watermelon flavor, fruity aroma and cheerful and energizing effect. It gives a pleasant state of euphoria after relaxing the muscles and taking away the negative thoughts but at the same time it allows to focus on a task with more energy and motivation. Ideal for social or artistic activities, without overlooking its medicinal properties to treat depression or post-traumatic stress. It is highly recommended for extractions due to its spectacular resin production and its richness in terpenes.

This year we are pleased to offer you a new line of American strains that we have bred after a number of trips to the USA. Some names may sound familiar to you, others not yet, but all of them will have a strong market presence very soon. These strains are different from the Europeans, in Europe we look for a plant that meets with certain requirements regarding production, stability and flavor that, as a whole, make a balanced plant in every way. In the case of the American varieties the selection is based more on the aroma, flavor and effect, rather than on productivity. Nevertheless, this does not mean that some of them can not be productive.

At Pyramid Seeds we aim to meet the demands of our growers with this new line of American Strains, which are very different from what they are used to. You will obtain the best results if you follow some recommendations we give you. One of the problems you might face is to find a hermaphrodite plant in some cases. This issue is not exclusive to our seed bank, it is an inherent characteristic of these plants in general. This fact can be due to sudden changes in temperature, an excessive fertilizer or stimulators use. Another piece of advice is to lower the dose of nutrients a 25% during the first week of the flowering stage and then increase it gradually until you meet manufacturer's recommendations. We hope you find these recommendations useful.
