

## Summit II

# SUMMIT II

### WHY SUMMIT II?

Summit II is the perfect solution for fit-outs and projects where multiple configurations are required. With electric, fixed height and touchdown options Summit II can be utilized in many situations.

## Summit II

# 01

## CONFIGURABLE

Desks can be any size, from 1200mm up to 2400mm (with overhang), beyond our selection of standard sizes. This is a necessity in the real world of projects where one size does not fit all.

# 02

## RANGE

Summit II has our biggest variety of formats. Including 90° pods and singles, 120° pods and singles, straight desk pods and singles, as well many more options. All with matching electric and fixed height desks.

# 03

## STOCK

We have a large stock holding of frames and legs in New Zealand. This lessens the possibility of inconvenient stockouts, which can impact deliveries and project dates.

# 04

## INSTALLATION

All desk tops are pre-drilled for the frames, reducing installation time and cost. Also making sure the finished result is correct and consistent.
