

GLOVE CARE GUIDE

LEATHER GLOVES

HAND WASH

We recommend spot cleaning first with a soft bristle brush before applying an oil-based saddle soap. Wash the gloves by hand with a damp cloth.

NO CHEMICALS

Do NOT use bleach or solvents as these oxidizing agents can cause discoloration and compromise the material.

AIR DRY

Air-dry your leather gloves to maintain proper sizing and prevent any material shrinkage.

NO HEAT

Do NOT machine dry with heat or expose the gloves to any heat source other than indirect sunlight.

DIPPED GLOVES

HAND WASH

We recommend rinsing dipped gloves under cool water and gently scrubbing with dishwasher detergent.

NO CHEMICALS

Do NOT use bleach or solvents as these oxidizing agents can cause discoloration and compromise the material.

WAIT TO DRY

Allow excess water to drain from dipped gloves before placing them somewhere to dry. Do NOT twist or wring the material.

NO HEAT

Do NOT machine dry with heat or expose the gloves to any heat source other than indirect sunlight.

SYNTHETIC GLOVES

MACHINE WASH

We recommend machine washing in cold water with a mild detergent.

NO CHEMICALS

Do NOT use bleach or solvents as these oxidizing agents can cause discoloration and compromise the material.

AIR DRY

Air-dry your synthetic gloves to maintain proper sizing and prevent any material shrinkage.

NO HEAT

Do NOT machine dry with heat or expose the gloves to any heat source other than indirect sunlight.

Warning: Cleaning can alter the performance levels of the glove
