

PYRAMEX

SAFETY SOLUTIONS CATALOGUE

YOU KNOW THE JOB.
WE KNOW THE PROTECTION.™

PERFORM AT YOUR PEAK

When a group of entrepreneurs founded Pyramex in 1991, it was rooted in a belief that the business could only grow if the customers were top priority. Nearly 30 years later, that level of intention has earned Pyramex more than 2,500 distributors in 65 countries. Your feedback ensures our product line is not only innovative and stylish, but upholds a high standard of workmanship that reflects your work ethic. Our founders knew that to serve our customers well meant to readily adapt to their business needs. That's why we're constantly evolving to make life easier for you. When you call Pyramex, you'll always talk with a specialist. The same goes for our new non-automated live web chat. We take pride in your safety so you can take pride in your work and Perform at Your Peak.

WHAT YOU NEED TO KNOW

SAFETY SOLUTIONS

Offering a full line of PPE

Your safety gear should be tough — deciding on it shouldn't be. When you work with Pyramex, we help you choose the perfect safety solutions for the job.

Regularly Evolving Our Design

Pyramex was founded on the principle that customer feedback would always guide our product line. Research met with your knowledge places our cutting-edge safety products at the front of the industry.

Customers Remaining Top Priority

Knowing our customers on a personal level allows us to anticipate your needs. We work to make finding the right safety solutions a painless process, regardless of where you are in the world. With Pyramex, not only can you customize your products, but we're also bringing imprinting in house to more feasibly accommodate your business. More so, when you call us, you'll always speak with a specialist who understands your goals. The same goes for our new non-automated live web chat. We thrive when you succeed.

Certifications

Eyewear

Our eyewear has been independently tested for various standards and certifications. Use the quick key (ANSI • CE • CSA • AS • Ballistic •) to reference product models that meet these standards and certifications. Use the dots next to each part number to reference which options meet the standards and certifications. See page 7 for more information on eyewear certifications.

Welding

Welding products have been independently tested for various standards and certifications. Use the quick key (ANSI • CE • CSA •) to reference product models that meet these standards and certifications. Use the dots next to each part number to reference which options meet the standards and certifications. See page 39 for more information on welding certifications.

Hearing

Our hearing products have been independently tested for various standards and certifications. Use the quick key (ANSI • CE •) to reference product models that meet these standards and certifications. Use the dots next to each part number to reference which options meet the standards and certifications. See page 45 for more information on hearing certifications.

Gloves

Our gloves have been independently tested for various standards and certifications. Use the quick key (ANSI • CE •) on the following pages to reference product models that meet these standards and certifications. Use the dots next to each part number to reference which options meet the standards and certifications. See page 49 for more information on glove certifications.

EYEWEAR LENSES

Lens Treatments

H2MAX Anti-fog Coating

The innovative technology behind the H2MAX creates a high performing, superior anti-fog coating that is durable enough to withstand repeated cleanings without losing adhesion. Not only does this premium treatment ensure maximum clarity in the most extreme temperature and humid conditions, but it also adds a layer to the lens that is abrasion and chemical resistant. The H2MAX anti-fog coating is made from non-hazardous environmental components. Coating resists scratching from steel wool up to 100g weight. H2MAX passes ANSI Z87.1 + standards, CE standards for N and K, and Canadian certification CAN/CSA Z94.3.

i H2MAX products can be cleaned with Pyramex lens cleaning towelettes. Do not use abrasive cleaning compounds, solvents, ammonia, or alkaline cleaners.

WATCH THE VIDEO
Vimeo.com/Pyramex/H2MAX

H2X Anti-fog Coating

H2X provides anti-fog, anti-scratch, and anti-static protection. Even after repeated cleanings, H2X will continue to be effective because, the coating is bonded to the lenses. The H2X anti-fog coating is made from non-hazardous environmental components. Coating is waterproof with excellent scratch resistance. H2X passes ANSI Z87.1 + standards and Canadian certification CAN/CSA Z94.3.

Proximity®

Lens Technology

Polycarbonate

All Pyramex safety eyewear utilize polycarbonate lenses. Polycarbonate lenses are up to 10 times more impact-resistant than plastic or glass lenses and provide 99% protection from the sun's harmful UV rays. They are lightweight and include a scratch-resistant coating to prevent surface scratches.

Polarized

Polarized lenses eliminate glare, increase visual clarity and enhance contrast all while reducing eye strain. We offer polarized grey option.

Photochromic

Photochromic lenses change from clear to dark, after exposed to direct UV light. Changes from dark to clear, after removed from UV light.

Lens Colours and VLT

When light passes through a lens, some of it is absorbed and some of it is reflected back. The amount of light that passes through is known as the visible light transmission (VLT) and is represented by a percentage. Lens colours with a higher percentage of VLT will be lighter and allow more light to pass through, while lens colours with a lower percentage of VLT will be darker, blocking more light from reaching your eyes.

94% Clear	38% Vermilion	14% Sky Red Mirror
89% Amber	27% Coffee	13% Ice Blue Mirror
84% Photochromic	27% Multi-colour Mirror	11% 3.0 IR Filter
82% Pink	27% Sandstone Bronze	10% Ice Orange Mirror
71% Infinity Blue	23% Grey	10% Smoke Green
66% 1.5 IR Filter	20% Sun Block Bronze	2% 5.0 IR Filter
61% Orange	18% Blue Mirror	
51% I/O Mirror	18% Silver Mirror	

Applications

Outdoor Use

- I/O Mirror
- Coffee
- Multi-colour Mirror
- Sandstone Bronze
- Grey
- Sun Block Bronze
- Blue Mirror
- Silver Mirror
- Sky Red Mirror
- Ice Blue Mirror
- Ice Orange Mirror
- Smoke Green
- Polarized Grey

Excessive Glare

- I/O Mirror
- Grey
- Blue Mirror
- Silver Mirror
- Sky Red Mirror
- Ice Blue Mirror
- Ice Orange Mirror
- Polarized Grey

Low Light

- Amber
- Pink
- Infinity Blue
- Orange
- Sun Block Bronze

Indoor Use

- Clear
- Amber
- Pink
- Infinity Blue
- Orange
- I/O Mirror

Enhance Contrast

- Amber
- Pink
- Infinity Blue
- Orange
- Vermilion
- Sandstone Bronze

Welding

- 1.5 IR Filter
- 3.0 IR Filter
- 5.0 IR Filter

i 1.5 IR is designed for peripheral personnel and visitors who are NOT exposed to direct IR radiation. Arc is great for use under the welding helmet – allowing welder to see work clearly without suffering “welder’s flash burn” from surrounding welders.

Marking Confirmations

Lens Markings

- Code - field of use
- 2 or 3: UV filter
- 4: IR Filter
- 5 or 6: Solar filter

- EN166: CE specification for protective eyewear
- 3: Liquid droplets or splashes
- 4: Large dust particles > 5 microns
- Mechanical Strength
- S: Extra strong, resists a 22 mm, 43 g ball falling 1.30 m.
- F: Low energy impact, resists a 6 mm, 0.86 g ball at 45 m/s.
- B: Medium energy impact, resists a 6 mm, 0.86 g ball at 120 m/s.
- A: High energy impact, resists a 6 mm, 0.86 g ball at 190 m/s.

i Markings in catalog may vary from markings on product.

EYEWEAR SEALED & FOAM PADDED

Sealed and foam padded eyewear are often ideal options for dusty or windy work environments. Many of our sealed and foam padded eyewear products also come with features like sealed rubber gaskets, interchangeable temples, and goggle straps which make them easily customizable.

I-Force

I-Force® and I-Force Slim

ANSI • CE • CSA • AS • Ballistic

Dual pane lens // Outer polycarbonate lens protects against the environment, while inner acetate lens prevents fogging // Outside lens is coated with anti-fog treatment // Quick release interchangeable temples and strap // Removable vented flame resistant foam carriage // Passes Ballistic MIL-PRF-32432 High Velocity Impact standards

148 mm

157 mm

i I-Force Slim is about 6% smaller than the I-Force.

EYEWEAR FULL FRAME

Full frame glasses feature lenses that are surrounded and held in place by a sturdy frame, making them perfect for a multitude of job applications or for leading an active lifestyle. They also tend to provide a closer fit than half frame or frameless options. We have an array of frame colours, patterns, and shapes to help you achieve the look that's right for you.

EYEWEAR HALF FRAME

Half frame glasses blend the breathability of a frameless design with the endurance provided by a full frame. Many of our half frame options come with an adjustable nosepiece feature allowing them to function and fit much like regular glasses. They are ideal for any application where both durability and an unobstructed line of vision are equally important.

EYEWEAR FRAMELESS

Frameless eyewear perfectly couples simplicity and style allowing them to work in applications and environments where a full field of vision is ideal, if not essential. Because they are lightweight and provide the wearer with an unobstructed view, they are excellent choices for those who are required to wear eye protection for long periods of time.

EYEWEAR GOGGLES

Goggles provide protection against a variety of different potential hazards, including things like chemical splash, flying particles, wind, sun glare, and dust. No matter what unique protection your application or environment requires, with features like thermo and anti-fog lenses, open and close ventilation systems, and removable face shields, we have goggles to meet your needs.

V2G-Plus

V2G-Plus® ANSI • CE • CSA • AS • Ballistic •

Includes a wide adjustable elastic strap with quick release system for secure fit // TPU frame features excellent resistance to cold and heat // Thermo Lens System provides excellent resistance to fog caused by temperature differences in your environment // Special indirect ventilation system located at the top and bottom of frame allows airflow and heat release // Multi-functional goggle with 180° vision protects against chemical splash, sun glare, dust, flying particles, and wind // Outer polycarbonate lens protects against the environment while an inner acetate lens prevents fogging // Inner lens is separated by a thin spacer of air and sealed together with foam // Passes Ballistic MIL-PRF-32432 High Velocity Impact standards // Passes EN166 3, liquid droplets

LEADHEAD®

AUTO-DARKENING HELMETS

Auto-darkening helmets are designed for maximum efficiency—and maximum safety. Designed to darken instantaneously at the light of a welding torch and clear up when the torch is turned off. The variable shade is intended to eliminate the process of lifting and lowering the helmet in order to see. Because an inactive lens often rests at either shade 3 or 4, seeing and starting the arc while still staying protected is easy. Auto-darkening helmets run off of solar power and batteries.

EWHAM3030GB

WHAM30 Series ANSI • CE • CSA •

4 / 5-8 / 9-13 stepless variable shade // 3.858" x 3.425" (98 x 87 mm) view area // Manual internal controls // Four independent sensors in staggered design // Solar cells and replaceable lithium-battery // Cutting, grinding and welding modes // 1/30,000 second switch speed // 5 amps and below TIG rating // High-impact resistant nylon // Up to shade DIN16 at all times

	EWHAM3030FL •••	Flame	4 1 5-8 1 9-13 PY 1 / 1 / 1 / 2 / 3 79 CE
	EWHAM3030FM •••	Fire Metal	4 1 5-8 1 9-13 PY 1 / 1 / 1 / 2 / 3 79 CE
	EWHAM3030GB •••	Glossy Black	4 1 5-8 1 9-13 PY 1 / 1 / 1 / 2 / 3 79 CE

i Auto-darkening helmets are suitable for all types of electro-weldings: covered electrodes, MIG/MAG, TIG/WIG, plasma welding, cutting and laser welding (only selected models with two shade ranges, i.e. 5-8 and 9-13), except for gas welding. Pyramex recommends Duracell® DL2450 replacement lithium-battery for EWHAM30 and Duracell® DL2032 for EWHAM10.

Hearing Certifications

Our hearing products have been independently tested for various standards and certifications. Use the quick key (ANSI • CE •) on the following pages to reference product models that meet these standards and certifications. Use the dots next to each part number to reference which options meet the standards and certifications.

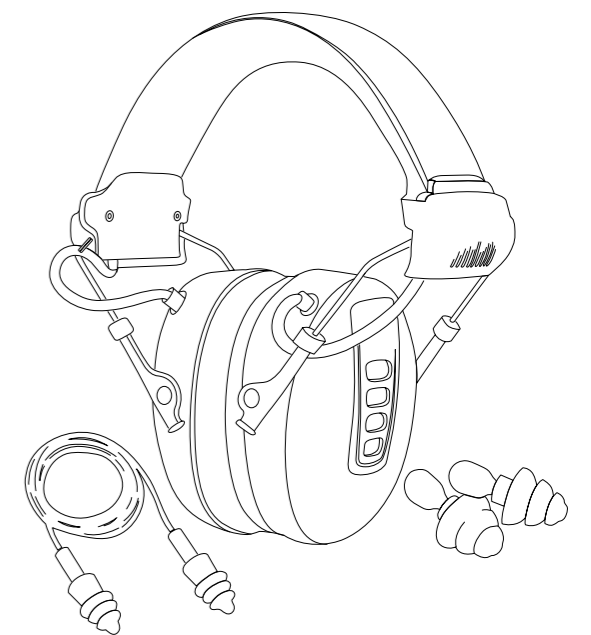

ANSI S3.19	•
CE EN 352:2002	•

ANSI S3.19 NRR

Noise Reduction Rating (NRR) is an estimated unit of measurement used to determine the amount of sound in decibels (dB) that a hearing device is capable of blocking out when properly worn.

CE EN 352:2002 SNR

Single Number Rating (SNR) is an estimated unit of measurement used to determine the amount of sound in decibels (dB) that a hearing device is capable of blocking out when properly worn. SNR also rates hearing protection by the noise environments in three categories: high-frequency (H), mid-frequency (M), and low-frequency (L).

HEARING PASSIVE EARMUFFS

PM80 Series ANSI • CE •
NRR 26dB SNR 30dB

HEARING METAL DETECTABLE EARPLUGS

RPD3001 Series ANSI • CE •
NRR 24dB SNR 30dB

Metal shavings embedded in the plug and cord for metal and magnetic detectability // Eye-catching blue colour contrasts with most food products // Three flexible rubber flanges form a secure seal // Reusable earplugs can be cleaned with soap and water

RPD3001 ••

DPD1001 Series ANSI • CE •
NRR 32dB SNR 37dB

Iron ball embedded in the plug for metal and magnetic detectability // Eye-catching blue colour contrasts with most food products // Expands to fit ear canal // Closed cell foam earplugs are resistant to dirt build up

DPD1001 ••

i RPD3001 | DPD1001

Metal detectable earplugs are designed for those working in food manufacturing. Almost all food manufacturing facilities use some form of metal detection in order to test outgoing products, ensuring they are free from contaminants. The blue colour is an important component of the earplug, too— it is a popular choice because it contrasts with most food colour.

WHAT YOU NEED TO KNOW

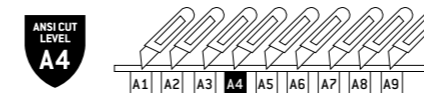

Glove Certifications

Pyramex work gloves have been independently tested for various standards and certifications. Use the quick key (ANSI • CE •) on the following pages to reference product models that meet these standards and certifications. Use the dots next to each part number to reference which options meet the standards and certifications.

ANSI/ISEA 105-2016 •
EN388:2003 // EN 420:2003+A1:2009 // EN388:2016 •

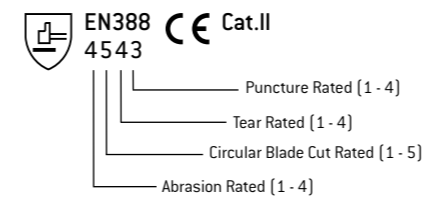

ANSI/ISEA 105-2016

ANSI standard features cut ratings that range from A1 through A9. Cut ratings are based on the grams of weight needed to cut through the material. Our ANSI cut level glove options include A2 (500-999 grams to cut), A3 (1,000-1,499 grams to cut) and A4 (1,500-2,199 grams to cut).

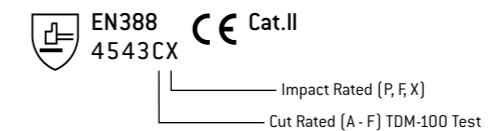

CE EN388:2003

CE EN388 standard features abrasion, cut, tear and puncture ratings. Abrasion ratings are based on the number of cycles required to abrade through the sample glove. Cut ratings are based on the number of cycles required to cut through the sample at a constant speed. Tear ratings are based on the amount of force required to tear the sample. Puncture ratings are based on the amount of force required to pierce the sample with a standard-sized point.

CE EN388:2016

The TDM-100 Test is an additional cut test. This test is done after the first 60 rotations of the Coup test to assess the durability of a glove more accurately. Levels include A (200-508 grams), B (509-1019 grams), C (1020-1529 grams), D (1530-2242 grams), E (2243-3058 grams) and F (3059+ grams). The new standard also features an Impact Protection Test. This test is only for gloves that are intended to provide impact protection. The Impact rating is based on the amount of impact energy (5 joules) dropped on the surface of the glove. Ratings include P (pass), F (failed), and X (not tested).

CE EN 420:2003+A1:2009

All Pyramex gloves comply with EN 420:2003 +A1:2009: Protective Gloves. General requirements and test methods.

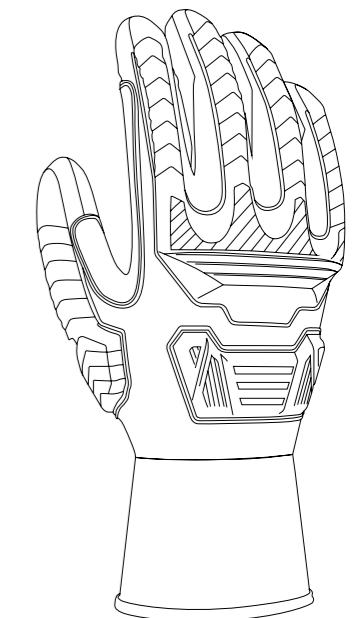

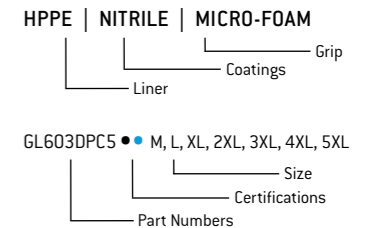

i Pyramex gloves that comply with the EN388:2003 standard can still be sold. As we move forward, we will start testing to the current 2016 standards.

Dipped Glove Sizing

The colour of the binding around the cuff indicates the glove size.

WHAT YOU NEED TO KNOW

The Hours Matter

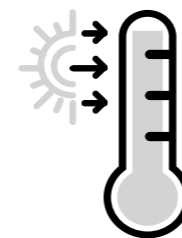

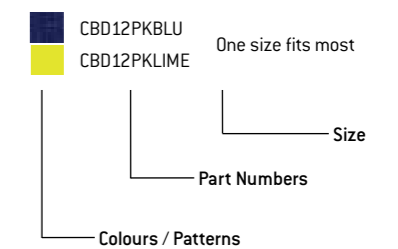

The most dangerous heat hours are between 11 am – 5 pm. Schedule frequent rest breaks to ensure you will not overheat.

Drink More Water

Drink about 1 cup of water every 15 to 20 minutes to prevent heat related stress or injury. Drink water before becoming thirsty.

Selection Chart

Know The Symptoms

Be aware of the signs and symptoms of heat-induced illnesses. Heat causes more deaths than any other weather-related hazards.

The Right Clothing

Wear clothing that is breathable, lightweight, and loose-fitting. Cooling products work as an additional relief from the heat.

COOLING MOISTURE-WICKING

C330 Series NON-RATED

Moisture-wicking towel // Microfiber material // Hi-vis material for greater visibility // Provides hours of cooling relief by regulating core body temperature // Reusable – simply soak in cool water // Machine washable
