### **Important Post Treatment Information For Insect Baiting:**

**Insect baiting is different from traditional spray treatments. Insect bait will attract insects to the bait product. This means that you may continue to see insects or an increased amount of insect activity...**

**This is normal. PLEASE DO NOT SPRAY!**

**If you spray, the bait will be contaminated, and the insects will no longer be attracted to the bait product.**

**The increase in insect activity after treatment may continue for a few days to a week – it's completely normal.**

**If you have any questions, please feel free to contact us anytime at 631-689-1421.**
