WATERMELONS

Baby Doll F1

Baby Doll F1

70 days maturity. A yellow fleshed diploid hybrid, 6-10 lb. fruits are perfect for the ice box. Green rind with small dark stripes, compare with Yellow Doll or Yellow Baby.

Triple Star F1

Triple Star F1

Triple Star has a dark striped rind and deep red flesh. The excellent demarcation and flesh quality will make Triple Star F1 a leader in the industry. High sugars, firm flesh, and virtually no hollow heart, are just a few quality standards easily met by this hybrid.

Triple Baby F1

Triple Baby F1

65 days to maturity. Triple Baby is black rinded, deep red fleshed personal sized triploid. This icebox type, has round shape fruit and an average weight of 5-8 lbs.

Bush Sugar Baby

Bush Sugar Baby

65 days to maturity. Superior icebox type, very early, thin hard tough rind, distinct stripes when immature becoming almost black when ripe. Fruit are round, 7-8.5 in. diameter, 5-8 lbs., firm sweet red orange flesh, drought resistant. Vines are compact and determinate.

Triple Prize F1

Triple Prize F1

85 days maturity. A triploid watermelon with medium green rind with dark stripes slightly darker than Triple Crown. Flesh is very red and crisp, fruit are oval and produce a concentrated set. Vines are vigorous and give excellent protection from sunburn. Fruits weight approximately 16-18 lbs.

Majesty F1

Majesty F1

80 days maturity. Majesty has very dark stripes, fruit are long and blocky, producing 20-23 lb. melons. Flesh is dark red with excellent flavor. Vines are vigorous with leaves that protect the fruit from sunburn. Compare to Fiesta and Sangria.

Golden Midget

Golden Midget

Sixty days to maturity. The thin light green rind turns a golden yellow at maturity. Rich red flesh is sweet and crisp. Plants are compact and can be grown in small gardens and large containers. The unique mixture of gold rinds and red flesh makes this a very attractive seven to eight inch melon.

Moon and Stars Yellow

Moon and Stars Yellow

Ninety days to maturity much like its red fleshed cousin. A family heirloom from Georgia, unique white seeded variety which was prized and shipped from Bermuda during Christmas in the South. Twenty inches long with the same dark rind and yellow spots as the red version. Average weight is twenty five pounds per fruit, but very tasty.

Moon and Stars Red

Moon and Stars Red

Ninety days to maturity. Large oval up to forty pound fruits have very sweet bright pink red flesh. The trademark dark green skin speckled with bright-yellow splashes ranging from small star to moon size. The leaves are also speckled with yellow. First introduced in 1926, a must see if you are a watermelon fan.

Cream of Saskatchewan

Cream of Saskatchewan

Seventy days to maturity. Excellent twelve inch round icebox fruits, pale-green skin with dark stripes, unique white flesh. Fruit weigh about seven pounds on average, small black speckled seeds, does well in cool Northern climates.

Triple Grey F1

Triple Grey F1

This is our seedless version of Regency F1. Weighing in at twenty plus pounds this Charleston Grey triploid has excellent flesh quality and red pink color. The firm crisp flesh is quite tasty and sweet. Heat tolerant and excellent in drought conditions.

Dixie Queen

Dixie Queen

Eighty days to maturity. Thin tough rind, light green striped with dark green background. Thirty plus pound fruit, firm bright scarlet red flesh, small white seeds, very few seeds. Vines are very vigorous and productive, uniform size and appearance, good shipper plus Fusarium Wilt resistant.

Yellow Petite

Yellow Petite

Eighty days to maturity. Oval round shape melon, with bright yellow flesh. This is a perfect icebox type, average fruit weighs five to seven pounds. Rind is green striped and the vines cover the fruit well.

Regal F1

Regal F1

New large seeded hybrid diploid with a dark green and striped rind. Selected for use in third world areas, this large seeded variety makes for ease in planting by hand. High quality, dark red flesh and firm crisp flesh as a bonus. The dark rind is sun resistant and does not fade. Easy to grow and also excellent for the home garden market.

Splendor F1

Splendor F1

Our first true Sugar Baby ice box melon. Dark green rind and small seven to nine pound fruits have bright red flesh. Early maturing in sixty days, selected and tested in Northern climates, but still well adapted to longer growing areas.

Grandeur F1

Grandeur F1

A true blocky Crimson Sweet type with red pink flesh. Fruit weight up to 30 pounds easily. Vigorous vines cover the striped gems. The rind is tough and ships well. If you are looking for a large Crimson Sweet type look no more.

Triple Score F1

Triple Score F1

This bright red fleshed hybrid has a very dark striped rind with excellent demarcation. The tasty sweet flesh is of the highest quality and could make Triple Score F1 a leader in the industry. High sugars, firm flesh, and virtually no hollow heart, are just a few quality standards easily met by this hybrid.

Regency F1

Regency F1

Eighty five days to maturity. Tough medium-thick hard, gray green rind with fine darker green veins. Fruit weigh at least thirty pounds, long fruit with red pink fiberless flesh, resistant to Fusarium Wilt, Anthracnose¹, Hollow Heart, White Heart, Ground Neck, sunburn and heat.

Triple Crown F1

Triple Crown F1

80 days maturity. Triple Crown has a medium green rind and dark green striping. Red flesh is firm and crisp. 18-20 pound fruit are oval and slightly elongated. Compare to Tri X 313, Millionaire, and 52-44. Triple Crown has excellent yields and fruit quality in many trials.

Triple Play F1

Triple Play F1

70 days maturity. An early red triploid seedless hybrid with very sweet bright red flesh. The rind color is light green with narrow dark stripes. A round 7-10 lb. melon. This is in the icebox size category which is being requested more and more.

Treasure Chest F1

Treasure Chest F1

80 days maturity. A yellow triploid seedless hybrid with very sweet, lemon yellow flesh. The rind color is light green with narrow dark stripes. A round 6-9 lb. perfect icebox watermelon.

Imperial F1

Imperial F1

Imperial is a hybrid diploid watermelon with an excellent yield of 18-21 lb. fruit. The deep red flesh is very sweet and firm. The rind is medium green with dark stripes. Crimson Sweet type, compare to Carnival.

Royalty F1

Royalty F1

Royalty is an early maturing diploid hybrid which produces 22-26 lb. red fleshed fruit. The rind is dark green with pale green stripes. Royalty F1 has excellent uniformity and taste. Makes a very good pollinator with an extended flowering period. Compare to Royal Sweet.

Georgia Rattlesnake

Georgia Rattlesnake

88 days to maturity. Old Southern favorite prized for its size, productivity, and eating quality, 22 x 10 in. diameter, 38-50 lbs., thin very tough rind, light green with irregularly mottled dark green Rattlesnake like stripes, firm sweet bright rose flesh.
