MELONS

**Incredible F1**

***Incredible F1***

The name says it all for this green fleshed cantaloupe. Fruit are sutured with pale green super sweet flesh. Vines are semi bush and set two to three pound fruit.

**Bodacious F1**

***Bodacious F1***

Early maturing ivory yellow skinned honey dew green flesh. Everyone loves honeydews this one has a pleasing pale yellow outer skin. The flesh is sweet and firm. Vines are vigorous and cover the fruit well from sunburn.

**Fabulous F1**

***Fabulous F1***

Vigorous vines produce perfectly oval pale green honeydew fruit with bright green flesh. These early maturing beauties have good disease resistance and hold well. The firm sweet flesh has very high sugar content.

**Scrumptious F1**

***Scrumptious F1***

This taste wonder is our version of the famous Ambrosia. The large oval fruit have fine netting and no sutures. The tender flesh is pale salmon blush to the seed cavity. Vigorous vine produce many tasty treats.

**Golden Honeymoon**

***Golden Honeymoon***

This unique bright golden skinned honeydew has been rediscovered. The color combination of the bright yellow rind and the pale green flesh is quite lovely. The sweet firm flesh is quite a treat. Enjoy growing these trailing vines in your garden.

**Aspire F1**

***Aspire F1***

French breakfast melons are a true gift from France. These personal size melons are extra sweet and extremely early. Remember that this type of melon can not be shipped to stores but are best enjoyed by home and market gardeners.

**Tuscany**

***Tuscany***

This Italian heirloom is named for its origin region in Italy. Like most Italian fruit and vegetables flavor is a must. These melons have both flavor and aroma. The elongated oval shape makes them easy to prepare and eat.

**Inspire F1**

***Inspire F1***

The market inspired us to create this petite flavorful mini cantaloupe. Semi round fruit weigh one to two pounds and has a semi bush vine. A flavorful and sweet space saver in the garden.

**Delightful F1**

***Delightful F1***

This large sutured cantaloupe can be describes as a classic Eastern muskmelon. The thick dark salmon flesh has that melon aroma that signifies summer. Bite into this sweet tender flesh and remember why you like melons.

**Sakata's Sweet**

***Sakata's Sweet***

This lovely melon originated in Japan. Asian melons have very crisp flesh and extremely high sugars. These white rind and white fleshed melons are a real treat. The vines are prolific and set six to seven fruit each.

**Extravagant F1**

***Extravagant F1***

A wondrous hybrid that brings the best from the honeydew world to the cantaloupe world. The crisp orange flesh is very thick and has a sweet flavor. The rind is almost net free and cream colored. These vines are disease resistant and vigorous.

**Early Silver Line**

***Early Silver Line***

Another unique gift for the Orient. Early Silver Line has deep yellow rind with white stripes in the sutures. The flesh is crisp and ivory. Seed cavity is small and when cut in rounds the fluted edge make a nice presentation. Vines are vigorous and set almost a dozen fruit.

| VARIETY                       | Maturity | Fruit Weight | Rind Color | Skin Texture | Netting | Flesh Color | Plant Type | Description  |
|-------------------------------|----------|--------------|------------|--------------|---------|-------------|------------|--|
