PUMPKINS

**Bumpkin F1**

***Bumpkin F1***

A cutie hybrid is for the small ornamental market, but also has excellent edible qualities. Bumpkin F1 has a semi bush plant habit with excellent yield potential. Fruit are larger Jack be little type with dark orange color and strong dark green handles. A big hit for the novelty markets.

**First Prize F1**

***First Prize F1***

The size of this pumpkin will range from 80 lb. to a whopping 300 lb. with color superior to the Atlantic types, this will be a great addition for those who want the biggest and best. The fruit matures in 120 days from planting on vigorous vines. Compare to Prizewinner F1.

**Harvest Princess F1**

***Harvest Princess F1***

85 days to maturity. This little darling weighs about 1.5 pounds and has a tremendous yield of perfect deep orange slightly ribbed miniature pumpkin. Harvest Princess F1 is semi vining and sets numerous fruit per plant, which makes it a must variety for any home garden or commercial pumpkin grower.

**Harvest Gold F1**

***Harvest Gold F1***

Harvest Gold is popular with both home gardeners and commercial growers. This hybrid has a precocious gene that causes the pumpkin to begin with a yellow color and turn golden orange at maturity. This unique gene along with Harvest Gold F1's early maturity can allow growers to catch up after adverse planting conditions.

**Harvest Queen F1**

***Harvest Queen F1***

A new high yielding sugar pie hybrid with concentrated sets. Harvest Queen F1 is a semi vining hybrid, which was selected in California and will be well adapted for Western climates as well as others.

**Hooligan F1**

***Hooligan F1***

Bicolored jack be little hybrid with orange and white mottled colors. Vines provide excellent cover for high yields of fruit. Grow with Bumpkin F1 and Gooligan F1 for a great novelty mixture.

**Casper**

***Casper***

Ninety days to maturity. A white skinned ornamental pumpkin with thick orange flesh of excellent eating quality, eight to twelve inch diameter, fruit weighs ten to sixteen pounds. Casper's skin has less bluing than many other white varieties. The handle is tan colored with a corky texture.

**Autumn Colors F1**

***Autumn Colors F1***

Ninety days to maturity. This pear shaped pumpkin has a crookneck, and weighs up to twenty five plus pounds. Fruits have a hard thin smooth rind of creamy white with green and orange stripes, the fine grained sweet golden flesh is excellent for baking and cooking, excellent keeper. The unique shape and color combination add spice to any fall display or garden.

**Dill's Atlantic Giant**

***Dill's Atlantic Giant***

Huge upright pale orange colored pumpkins which weigh up to eight hundred pounds. Vines are very vigorous and must have large spacing and planting area. PVP variety from Howard Dill in Nova Scotia. Very long season matures in one hundred and twenty days.

**Yellow of Paris**

***Yellow of Paris***

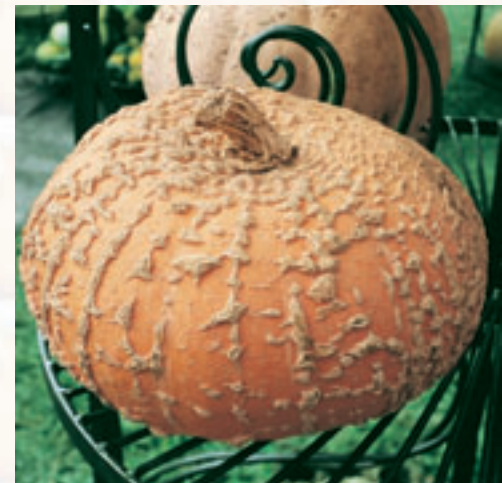

Large yellow to peach colored fruit are a French native which are still used today. These flattened round beauties are similar in shape to Cinderella, they can weigh as much as fifty pounds. The pale orange flesh is used mainly for pies, soups or baked. Yellow of Paris is prized for its flavor when cooked.

**Cinderella**

***Cinderella***

Another lovely French heirloom which was first offered in the United States by W.A. Burpee in 1883. Red orange fruits are six to eight inches deep and eighteen inches in diameter. Cinderella pumpkins range from fifteen to twenty-five pounds. Spectacular for fall color and decorations.

**Galux D' Eysines**

***Galux D' Eysines***

Ninety five to one hundred days to maturity. Raised bumps over the skin surface makes this quite a novelty. Pumpkin skin is pink with beige scars or bumps that resemble peanuts. Fruit are shaped like a wheel of cheese, unknown to the US until 1996. This French heirloom will add color and texture to any fall display. Remember this variety for your next summer plantings.

**Show Winner**

**Show Winner**

Very large fruits weighing from 250 to 400 pounds. This king size pumpkin is a rainbow of colors. They include orange, yellow, grey, blue and green. The green version is pictured here. We are reintroducing this variety for its unique novelty colors and large size.

**Fairytale**

**Fairytale**

Traditional variety from the south of France. Gorgeous, big flat fruits are heavily ribbed and look similar to large wheels of cheese. Fairytale fruit average twenty pounds and ripen to a rich brown when fully ripe. The deep orange flesh is very fine grained, one of the best for baking. Long season, matures in one hundred and ten days.

**Green Striped Cushaw**

**Green Striped Cushaw**

One hundred days to maturity. Formerly known as Improved Cushaw, the hard thin smooth rind, has green mottled stripes over creamy white, weighs up to 20 pounds. This is a beautiful heirloom, pear shaped pumpkin with crookneck, very prolific, old favorite, thick fine grained sweet pale yellow flesh, canning boiling baking pies or stock feed.

**Jarradale**

**Jarradale**

Ninety five days to maturity. Uniquely blue skinned pumpkin, from Australia, usually weighs seven to eight pounds with a ten inch diameter. Jarradale has excellent flesh quality a must for any market grower or gardener who wanting to add color to displays and packs.

**Wee Be Little**

**Wee Be Little**

This 1999 All American Selection winner, matures in about ninety-five days. Fruit are small almost round, three inch by three inch, weighing one pound. Wee Be Little is well suited for baby carving pumpkins or painting. Also has very tasty flesh when cooked.

**Mini Harvest Blend**

**Mini Harvest Blend**

These cutesy hybrids were created for the ornamental mini pumpkin market, but also have excellent edible qualities. Bumpkin has a semi bush plant habit with excellent yield potential. Fruit are larger and smoother than Jack Be Little with dark orange skin and strong dark green handles. Gooligan is a Baby Boo hybrid, vines are vigorous and provide excellent cover, plants set high numbers of unique white pumpkins. Hooligan is a bicolored Jack Be Little hybrid with orange and white mottled fruit. Grow Bumpkin, Gooligan and Hooligan for a great novelty mixture.

**Jarradale**

**Jarradale**

95 days to maturity Uniquely blue skinned pumpkin, usually weighs 7-8 lbs. with a 10 inch diameter, excellent quality flesh. This Australian variety has excellent flesh quality a must for any market grower wanting to add color.

**Gooligan F1**

**Gooligan F1**

White jack be little hybrid with deep ribbed fruit. Vines are vigorous with excellent cover, plants set high numbers of unique fruit. Excellent eating quality and flavor.

**Harvest Ace F1**

**Harvest Ace F1**

105 days to maturity, Harvest Ace F1 will meet the need of the 20-25 lb. pumpkin market. Maturing in only 105 days, this hybrid has a good dark green handle with bird's foot attachment. This trailing pumpkin is very dark gold with distinctive ribs and has a uniform shape that is deep round to slightly tall.

**Hobbit F1**

**Hobbit F1**

We have had quite a few requests for a 10-12 lb. pumpkin with powdery mildew tolerance. Hobbit F1 PMR will work perfectly for growers to fill out their smaller pumpkin needs. This variety sets much earlier than most PMR hybrids.

**Harvest Prince F1**

**Harvest Prince F1**

Similar to Touch of Autumn F1, but with powdery mildew tolerance. Long handles with good attachments and skin of deep orange color make this semi-bush pumpkin a big yielder and matures in 85 days under most conditions. Fruit size is in the 1 lb. pie market, and is recommended for cooking, painting and carving.

**Harvest Jack F1**

**Harvest Jack F1**

22-28 lb. Dark orange skin and four inch long handles make handling easy. Fruit are medium long with a vigorous plant structure. Full maturity in 105 days. Exceptional yield potential under most growing conditions
