**PEPPER CHERRY MINI HOT F1**

Who does not love pickled cherry peppers? These small fiery wonders are half the size of a regular hot cherry fruit. The sturdy plant produces round ½-inch glossy red fruits. Cherry Mini Hot F1 is good for pickling or adding heat to any dish.

**PEPPER CIENFUEGOS ORANGE**

80 - 85 days to maturity. Back by popular demand, Pepper Cienfuegos Orange F1 is a high yielding orange habanero hybrid. If you are wanting uniformity, increased yield, and early maturity this is the habanero pepper for you. Its fruits are 1.5 inches by ¾ inch. Pepper Cienfuegos Orange F1 has a fruity hot flavor and ranges from 200,000 to 300,000 on the Scoville scale.

**PEPPER CIENFUEGOS YELLOW**

80 - 85 days to maturity. Pepper Cienfuegos Yellow F1 is a high yielding yellow hybrid habanero. Its 2.5 inches by 1-inch fruit are very fragrant and contains a fruity flavor. Pepper Cienfuegos Yellow F1 ranges from 250,000 to 350,000 on the Scoville scale. Do not let these beautiful true yellow peppers fool you, they have a hot bite to them.

**PEPPER CIENFUEGOS RED**

80 - 85 days to maturity. Pepper Cienfuegos Red F1 is a high yielding red habanero hybrid. Its fruits are 2 inches by 1 inch. These bright carmen red colored fruits range from 300,000 to 400,000 on the Scoville scale.

**PEPPER WICKED GHOST**

110 days to maturity. There is not a pepper that is too hot! Now arriving is our first hybrid ghost pepper with a heat level off the charts. With an estimated Scoville unit rating of 800,000 plus, these 2.5-inch pointed lanterns are a deep red color with smooth skin. Be the first to grow this extra hot, early maturing extreme pepper variety.

**PEPPER HERNANDEZ F1**

Pepper Hernandez F1 is a classic red Fresno pepper with a distinctive mild to medium heat. The 22 to 24-inch sturdy plants produce a large crop of conical, 2 to 3-inch bright red fruit. Pepper Hernandez F1 is prized for its thick red flesh that can be eaten fresh or roasted.

**PEPPER MEXICAN SUNRISE F1**

Pepper Mexican Sunrise F1 brings to the garden a full spectrum of colors, from lime green to yellow then orange and red as the fruit matures. The conical, pendant-shaped peppers are thick-walled and semi-hot. They can be eaten at any stage. Vegetable gardeners are sure to love this attractive fruit.

**PEPPER MEXICAN SUNSET F1**

Mexican Sunset F1 is a compact, high-heat Hungarian hot wax pepper. The fruit sets early then prolifically throughout summer, bringing a variety of colors to the garden, as the fruits mature. These conically pointed peppers produce a thick-walled fruit, that can be eaten at any stage. Mexican Sunset F1 is excellent eaten fresh, baked, grilled, or pickled.

**PEPPER THAI SCORPION**

Our hybrid version of the very hot culinary wonder. Thai peppers are prized for their flavor and heat. These dark green peppers mature to red and are 100% smooth. The umbrella shaped plants protect the fruit completely from sunburn.
