**Cucumber Parisian Gherkin F1**  
**AAS 2015 Edible Winner**  
**Regional Winner (Northeast, Mountain/Southwest)**

Parisian Gherkin F1 is an excellent mini or gherkin pickling cucumber which can be picked either at the midget size or small pickle stage and processed. The numerous black spined cucumbers can also be enjoyed fresh in salads and slaws. The crisp cucumbers have a sweet flavor and process into pickles well. The semi vining plants can be planted in the garden or staked patio containers. Plants grow and produce quickly. Parisian Gherkin is one of two organic AAS Winners—a first for this organization!

Bred by Terra Organics

## AAS® Winner Data

**Genus species:** *Cucumis sativus*

**Common name:** Cucumber

**Unique qualities:** Excellent disease resistance for a home garden variety.

**Fruit size:** 2-4 inches long

**Fruit shape:** Tapered

**Fruit color:** Medium green

**Plant type:** Annual

**Plant height:** 24 inches

**Plant width:** 24 inches

**Garden location:** Full sun

**Garden spacing:** 20-24 inches

**Number of fruits:** 20-25 fruits per plant

**Length of time to harvest:** 50 days from sowing seed

**Closest comparisons on market:** Pioneer F1 and Artist F1

**Disease tolerances:** Scab and CMV resistance, PM tolerance

## Cucumber 'Pick a Bushel' F1

**AAS 2014 Vegetable Award Winner**  
**Regional Winner (Heartland and Great Lakes regions)**

This Regional AAS Winner is great for northern areas because it is early to set fruit, offers a prolific quantity of fruit and is a compact bush type cucumber spreading only about 24 inches. 'Pick a Bushel' offers a sweeter tasting light-green cucumber with a nice firm texture, perfect for pickling when harvested early. Fruits left on the bush-type vines longer can get up to 6" long and can be enjoyed fresh in salads. For those gardeners looking for a cucumber that can be grown in patio containers, 'Pick a Bushel' is a great option.

Bred by Seeds By Design and W. Atlee Burpee Co.

### AAS® Winner Data

**Genus species:** *Cucumis sativus*

**Common name:** Cucumber

**Unique qualities:** Excellent heat tolerant pickling cucumber which can be picked at the gherkin or spear stage and processed. The large yields of cucumbers can also be enjoyed fresh in salads and slaws. Semi bush plants can be planted in the garden or patio containers.

**Fruit size:** 3-6 inches long, 2-4 ounces

**Fruit shape:** Cylindrical

**Fruit color:** Medium green

**Plant type:** Annual

**Plant height:** 10-12 inches

**Plant width:** 24-25 inches

**Garden location:** Full sun

**Garden spacing:** Sow seeds 8-10 inches apart within the row

**Length of time to harvest:** 50 days

Closest comparisons on market: 'County Fair' F1, 'Regal' and 'Calypso' F1

## **Cucumber Saladmore Bush F1** **AAS 2014 Vegetable Winner** **Regional Winner (Southeast)**

Saladmore Bush F1 Cucumber boasts a bush-type growth habit making this AAS Winner perfect for growing in container gardens. Anyone looking for a good slicing type cucumber with dark green skin and long straight fruits will enjoy this beauty, along with its superior taste and texture; a perfect reflection of summer's bounty. An added bonus is the disease resistance that proved to be especially valuable in warmer climates where comparison varieties easily succumbed to late season diseases.

Bred by Seeds By Design

### **AAS® Winner Data**

**Genus species:** *Cucumis sativus*

**Common name:** Cucumber

**Unique qualities:** This semi bush vine sets sweet crisp cucumbers as long as you keep them picked. Good garden performance due to the multiple disease resistances. Has dual use, pick small for processing as pickles and harvest larger for fresh slices or spears.

**Fruit size:** 7-8 inches

**Fruit shape:** Tapered, cylindrical

**Fruit color:** Dark green

**Plant type:** Annual

**Plant height:** 24-26 inches

**Plant width:** 24 inches

**Garden location:** Full sun

**Garden spacing:** 24 inches

**Length of time to harvest:** 55 days from sowing

**Closest comparisons on market:** Fanfare F1, Salad Bush, Bush Champion

**Disease tolerances:** CMV, Scab, anthracnose, PM tolerance

**Basil Persian**  
**AAS 2015 Edible Winner**  
**Regional Winner (Heartland, Mountain/Southwest and West/Northwest)**

The first of three organic herbs we are introducing as AAS Winners—another first for this organization! Persian Basil is a large, vigorous plant that is a prolific producer of pleasant tasting leaves for your culinary adventures. Not only is the taste excellent, but the green foliage, sturdy branches and large leaves make for a great ornamental plant. An additional bonus is that this Winner is late to produce flowers, which often make basil develop a bitter taste. Need one more reason to try Persian Basil? The bees were very active around this entry in the trials so you'll also do your pollinator friends a favor having this basil in your garden.

Bred by Terra Organics

## AAS® Winner Data

**Genus species:** *Ocimum basilicum*

**Common name:** Persian basil, anise basil

**Fruit size:** 1 x 2/3 inch leaves

**Fruit shape:** Flattened leaves

**Fruit color:** Green

**Plant type:** Annual

**Plant height:** 12-15 inches

**Plant width/spread:** 15 inches

**Plant habit:** Bushy

**Garden location:** Full sun

**Garden spacing:** 12-15 inches

**Number of fruits:** Prolific

**Length of time to harvest:** 30 days from transplant, 75 days from seed

**Closest comparisons on market:** Cinnamon Basil, Siam Queen

**Chives, Garlic Geisha**  
**AAS 2015 Edible Winner**  
**National Winner**

The second of three organic herbs in this grouping of AAS Winners, Geisha is a vigorous grower with a nice 'just-right' garlic flavor. Slightly wider, flatter and more refined leaves topped by pretty white flower stalks late in the season mean this is another edible that can serve a dual purpose as an ornamental. Geisha is a great culinary herb for use in stir-fries, soups, compound butters and as a fresh garnish for a variety of dishes. Although late flowering is a good thing in herbs, when Geisha does burst into bloom, the butterfly inhabitants in your garden will be very happy!

Bred by Genesis  
Offered by Terra Organics

## AAS® Winner Data

**Genus species:** *Allium tuberosum*

**Common name:** Garlic Chives

**Fruit size:** 12 inches

**Fruit shape:** Long strap leaves

**Fruit color:** Green

**Plant type:** Perennial

**Plant height:** 18-20 inches

**Plant width/spread:** 10-12 inches

**Plant habit:** Upright

**Garden location:** Full sun

**Garden spacing:** 10-12 inches

**Number of fruits:** Many

**Length of time to harvest:** 30 days from transplanting, 75 days from sowing seed

**Closest comparisons on market:** Garlic Chives, Nira

**Oregano Cleopatra**  
**AAS 2015 Edible Winner**  
**Regional Winner (Northeast and West/Northwest)**

Cleopatra is the third of the organic herbs introduced at this time. Pretty silver gray foliage makes this another herb that will be appreciated for its ornamental value. Unique from Greek and Italian oreganos, Cleopatra has a pepperminty and mildly spicy flavor perfect in Mediterranean dishes, soups and sauces. This compact, trailing plant produces a high yield of leaves that are wonderful as a dried spice when fresh isn't an option.

Bred by Terra Organics and Genesis Seeds

### AAS® Winner Data

**Genus species:** *Origanum syrica*

**Common name:** Oregano

**Fruit size:**

**Fruit shape:** Tiny rounded leaves

**Fruit color:** Green

**Plant type:** Perennial

**Plant height:** 5-6 inches

**Plant width/spread:** 9-10 inches

**Plant habit:** Low growing, spreading and trailing

**Garden location:** Full sun

**Garden spacing:** 7-8 inches

**Number of fruits:** Many

**Length of time to harvest:** 30 days from transplanting, 100 days from sowing seed indoors

**Closest comparisons on market:** Greek, Italian

**Lettuce Sandy**  
**AAS 2015 Edible Winner**  
**National Winner**

The first AAS winning lettuce since 1985, Sandy is an attractive oakleaf type lettuce with a multitude of sweet tasting frilly dark green leaves. Not just pretty and tasty, Sandy has exceptional disease resistance, especially to powdery mildew and is slow to bolt. Use Sandy as cut and come again baby leaf, or grow to full maturity for loose salad heads. The uniformly mounded loose heads are well adapted to both raised beds and containers. When planted with cool season flowers, Sandy will add an abundance of interesting texture to patio containers. Sandy is the second AAS Winner that is available as organic seed.

Bred by Terra Organics

## AAS® Winner Data

**Genus species:** *Lactuca sativa*

**Common name:** Lettuce

**Unique qualities:** Excellent disease resistance, frilly loose heads and improved for a home garden variety. The sweet leaves are typically not bitter when heat stressed. Well adapted to container gardens or raised beds. Available as organic seed.

**Fruit size:** 10-12 inch loose heads

**Fruit shape:** Heads of loose serrated leaves in a tight cluster

**Fruit color:** Bright green leaves and pale green in the middle

**Plant type:** Annual

**Plant height:** 10 inches tall

**Plant width:** 10-12 inches

**Garden location:** Full sun to partial shade

**Garden spacing:** 10 inches

**Number of fruits:** 1

**Length of time to harvest from sowing seed:** 30 days baby leaf, 45-50 days to full maturity

**Closest comparisons on market:** Green Salad Bowl and Lettuce Pannisse

**Disease tolerances:** Powdery Mildew, Downey Mildew and Tip Burn resistant; heat tolerant

**Bunching Onion Warrior**  
**AAS 2016 Edible Winner**  
**Regional Winner (Mountain/Southwest, Southeast)**

Now home gardeners have an easy-to-grow bunching onion (also known as a green onion) that is an All-America Selections Winner. Warrior grows quickly and thus matures early, producing a very uniform crop of slender, crisp onion stalks that are easy to harvest and clean. Can't get to your harvest? No worries as Warrior will hold up in the garden longer than similar varieties that were grown as comparisons in the trials. Warrior can be used raw to add texture, flavor and color to all kinds of dishes or they are delicious grilled whole as part of a grilled vegetable platter or entrée accompaniment.

Bred by Seeds By Design

## AAS® Winner Data

**Genus species:** *Allium fistulosum*

**Common name:** Bunching onion

**Fruit taste:** Pungent

**Fruit size:** ½ inch wide

**Fruit shape:** Thin and cylindrical

**Fruit color:** White and green

**Plant height:** 20-24 inches

**Plant width/spread:** 1-2 inches

**Plant habit:** Upright

**Garden location:** Full sun

**Garden spacing:** 3-4 inches

**Number of fruits:** 1

**Length of time to harvest:** 60 days from seed, 30 days from transplant

**Closest comparisons on market:** Tokyo Long White Bunching, Ishikura Improved

**Pea Patio Pride**  
**AAS 2017 Edible Winner**  
**Regional Winner - Southeast**

This compact beauty produces sweet, uniform pods that are very tender when harvested early. With only 40 days needed to maturity, Patio Pride can be one of your first spring harvests, or one of the last fall harvests from your Southeastern garden! This pea is wonderful when planted in containers and is ideal for succession planting yielding a consistent harvest over many weeks. Plant in patio containers with cool season flowers for a beautiful combination ornamental and edible display. Direct seeding is recommended; seed 3-4 seeds every 6 inches then thin to one seedling every 6-8 inches.

Bred by Terra Organics

## AAS® Winner Data

**Genus species:** *Pisum sativum*

**Common name:** Pea

**Fruit flavor:** Tender, sweet

**Fruit size:** 2-3 inches

**Fruit shape:** Elongated pod

**Fruit color:** Green

**Plant type:** Annual

**Plant height:** 10 inches if not trained on a support

**Plant habit:** Compact

**Garden location:** Full sun

**Garden spacing:** 10 inches apart

**Length of time to harvest:** 40 days from sowing seed, transplanting not recommended

**Ornamental Pepper Black Hawk F1**  
**AAS 2016 Ornamental from Seed Winner**  
**Regional Winner: Southeast and Heartland**

If you are looking for a plant with adorable little ornamental peppers that start off black and change to a beautiful, head-turning red, you'll be over the moon for our newest AAS regional ornamental pepper winner, Black Hawk F1. This newest in our ornamental pepper winners is a very early flower and fruit producer that keeps up production through fall. The consistent plant habit and well branched fullness of the dark green, purple black foliage make it an excellent addition to any mixed container, flower bed or cut flower design. The red conical shaped fruit are edible but not recommended as they are very spicy.

Bred by Seeds By Design

## AAS® Winner Data

**Genus species:** *Capsicum annuum*

**Common name:** Pepper

**Unique qualities:** Compact hybrid ornamental hot pepper with dark black purple conical fruit. Leaves are also purple. Plants cover quickly and last from summer to the first frost. Excellent performance in the Sunbelt.

**Flower color:** Purple

**Foliage color:** Purple Black

**Flower size:** 1/3 to 1/2 inch

**Plant height:** 10-12 inches

**Plant type:** Annual

**Garden location:** Full sun

**Garden spacing:** 7-8 inches

## Pepper Black Olive AAS 2012 Flower Award Winner

The AAS Judges said this entry was a standout, especially in the southern gardens where heat was a major presence during the 2011 trials. All season long this beauty kept its upright habit with nicely draping leaves and dark purple/black fruit which appeared in small clusters along the stems. As summer progresses, the fruits mature to red giving a beautiful contrast against the dark purple foliage and bright purple flowers. Retailers and growers can sell this multi-use ornamental as a 20" border plant, a great color splash for containers or as a cut flower in mixed bouquets.

Bred by Seeds By Design.

### AAS® Winner Data

**Genus species:** *Capsicum annuum*

**Common name:** Pepper

**Unique qualities:** This attractive plant can be used in containers, borders, and as cut flowers

**Fruit size:** 1/2-1 inch

**Fruit shape:** oval

**Fruit color:** purple/black

**Plant type:** upright, eye-catching purple foliage

**Plant height:** 20-24 inches

**Plant width:** 15-24 inches

**Garden location:** Full sun

**Garden spacing:** 15 inches

**Length of time to harvest:** 60-85 days to maturity

**Closest comparisons on market:** 'Black Pearl'

**Pepper Giant Ristra F1**  
**AAS 2014 Vegetable Winner**  
**Regional Winner (Mountain/Southwest)**

Talk about versatility! Giant Ristra F1 looks like a red Marconi pepper but has the heat of a cayenne. The texture and heat (hot, but not too hot) of this pepper makes it an excellent eating variety while it can also be dried and used in dishes for up to one year. Should you choose to use the peppers for a decoration, they can be used to make a beautiful ristra of dried peppers.

In the mountain and southern trial gardens, Ristra produced an exceptionally high yield of uniformly shaped peppers on attractive plants which judges reported were very easy to grow.

Bred by Seeds By Design

## AAS® Winner Data

**Genus species:** *Capsicum annuum*

**Common name:** Pepper

**Unique qualities:** Heavy yield of bright red very hot 7-inch chile peppers. Has the appearance of a marconi but the spiciness of a cayenne. Fruits can be consumed fresh, roasted, or dried and used as herb. Giant Ristra red fruit can strung together in long bunches and dried and displayed and used throughout the winter months.

**Fruit size:** 6-7 inches long, 1.5 inches wide

**Fruit shape:** Elongated horn

**Fruit color:** Red

**Plant type:** Annual

**Plant height:** 26-28 inches

**Plant width:** 12-14 inches

**Garden location:** Full sun

**Garden spacing:** 12-14 inches

**Length of time to harvest:** 110 days from seed, 80 days from transplant

**Closest comparisons on market:** Sahuaro F1, Cheyenne

**Pepper 'Mama Mia Giallo' F1**  
**AAS 2014 Vegetable Award Winner**  
**National Winner**

Judges declared this a “great yellow pepper” because of the huge yield, uniform shape and smooth skin of the long, tapered fruits and the beautiful yellow/gold color when mature. ‘Mama Mia Giallo’ has a nice sweet flavor that is excellent either fresh or roasted. For gardeners eager for their harvest, this pepper offers ripe fruits 85 days after transplanting making it one of the earliest yellow marconi peppers on the market. An added bonus is the somewhat compact 24” plant that takes up less space and offers disease tolerance to Tobacco mosaic virus.

Bred by Seeds By Design

## AAS® Winner Data

**Genus species:** *Capsicum annuum*

**Common name:** Pepper

**Unique qualities:** Heavy yields of bright yellow/gold elongated peppers. Well suited for roasting, very sweet flesh can be used fresh or processed.

**Fruit size:** 7-8 inches long, 4-5 oz., 1.5-2 inches wide

**Fruit shape:** Elongated Horn

**Fruit color:** Yellow

**Plant type:** Annual

**Plant height:** 24 inches

**Plant width:** 18-20 inches

**Garden location:** Full sun

**Garden spacing:** 15-18 inches

**Length of time to harvest:** 85 days from transplant

**Closest comparisons on market:** ‘Golden Treasure’, ‘Golden Marconi’

**Disease tolerances:** Resistance to TMV

## Pepper Mexibell F1

### AAS 1989 Vegetable Award Winner

Mexibell F1 was awarded AAS winner in 1989. Originally bred by Sunseeds, Seeds by Design is continuing to offer this unique hot bell pepper for the home garden and bedding plant market. This full flavored spicy green to red bell pepper is perfect addition for any kitchen garden. It's medium Jalapeno flavor is excellent used fresh in salsas or roasted on the grill. Fruit set on tall upright plants. Each fruit is a perfect short miniature bell with very thick walls.

Offered by Seeds By Design.

### AAS® Winner Data

**Genus species:** *Capsicum annuum*

**Common name:** Pepper

**Unique qualities:** 1989 AAS winner is a short green to red bell shaped pepper with the flavor of a medium jalapeno. Adapted for many growing regions and makes a great bedding plant for tasty home cooked Mexican cuisine.

**Fruit size:** 3 x 3 inches

**Fruit shape:** small bell

**Fruit color:** green to red

**Plant type:** sturdy vigorous upright

**Plant height:** 20 inches

**Plant width:** 15-20 inches

**Garden location:** Full sun

**Garden spacing:** 15-18 inches

**Length of time to harvest:** 75 days to maturity

## Pepper Hungarian Mexican Sunrise F1

**AAS 2018 Edible Winner**

**Regional Winner: Southeast and Mountain/Southwest**

Mexican Sunrise Hungarian Pepper F1 brings to the garden a full spectrum of colors from lime green to yellow then orange and red as the fruit matures. These earlier maturing conical pendant shaped peppers produce a thick walled fruit that can be eaten at any stage. The fruits are semi-hot, attractive peppers which can be used for ornamental purposes as well as for processing, pickling and fresh preparations. Vegetable gardeners are sure to enjoy this pepper with its attractive fruit, early maturity and high yielding plants that look great in any gardenscape.

## Pepper, Hungarian Mexican Sunset F1

**AAS 2018 Edible Winner**

**Regional Winner: Southeast**

Mexican Sunset Pepper F1 is a compact, high-heat Hungarian hot wax pepper well-suited for traditional gardens as well as urban and container gardening. Fruit sets early then prolifically throughout the summer bringing a variety of colors to the garden as the fruits mature. These conical pointed peppers produce a thick walled fruit that can be eaten at any stage and as the judges said, the fruits just continue to taste better the riper they get! Great eaten fresh, stuffed and baked, grilled or pickled.

**Pepper Pretty N Sweet F1**  
**AAS 2015 Edible Winner**  
**National Winner**

Look...in the garden! Is it an ornamental pepper? Is it edible? Yes to both! Now we can tell consumers that an ornamental pepper CAN be eaten and it tastes fantastic! It's time for new terminology to describe this multi-purpose plant...how about an "Ornamedible?" Pretty N Sweet is just that: a sweet, multi-colored pepper on a compact 18" plant that is attractive to use in ornamental gardens and containers. Against the comparisons, Pretty N Sweet was earlier, more prolific (you can harvest weekly in peak season) and has a much sweeter taste with more substantial pepper walls to enjoy fresh or in your favorite pepper dish.

Bred by Seeds by Design

## AAS® Winner Data

**Genus species:** *Capsicum annuum*

**Common name:** Sweet pepper

**Fruit size:** 1-1.5 inches

**Fruit shape:** Small conical

**Fruit color:** Orange, red and yellow

### **Pumpkin Blue Prince F1** **AAS 2020 Edible Winner** **National Winner**

“Princely” is defined as being sumptuous and splendid; this AAS Winner lives up to its name! For any edible entry to become an AAS Winner, it must outperform the comparisons and Blue Prince Pumpkin certainly scored high in the areas of maturity (earlier), yield, fruit size and uniformity, color, taste and texture. Vigorous trailing vines produce 7-9 beautiful blue flattened pumpkins with non-stringy, deep orange flesh with a savory sweetness. These pumpkins are as pretty as they are delicious; after fall decorating, bake the flesh for a smooth and creamy treat. Of all the varieties trialed, Blue Prince was first to flower and fruit which is beneficial for gardeners with a shorter growing season. Plus, this winner has slightly better disease resistance than the comparisons. A judge’s testimonial: “Overall, if I was looking for a blue pumpkin to display AND eat, I’d pick this entry every time!”

[Bred by Seeds By Design Inc.](https://www.seedsbydesign.com/)

**Pumpkin 'Cinderella's Carriage' F1**  
**AAS 2014 Vegetable Award Winner**  
**Regional Winner (Southeast, Great Lakes and Mountain/Southwest regions)**

'Cinderella's Carriage' is a dream come true for any princess-loving child who wants to grow their own fairy tale type pumpkin. This bright reddish-orange pumpkin is the first hybrid Cinderella-type pumpkin on the market which results in a higher yield as well as Powdery Mildew resistance in the garden. Robust and vigorous vines produce large fruits ranging from 25-35 pounds, creating a whole grouping of carriages for all the princesses in your family!

Bred by Seeds By Design

## AAS® Winner Data

**Genus species:** *Cucurbita maxima*

**Common name:** Pumpkin

**Unique qualities:** Pink-red colored fruit shaped like the pumpkin carriage from the fairytale Cinderella. Some lucky gardeners could also experience a pale blue pumpkin. Large trailing vine sets up to 5-7 fruit per plant. Well suited for fall decorations and baking. Flesh is yellow, sweet and has a nutty flavor.

Requires a large garden space for best results.

**Fruit size:** 15-18 inches, 18-20 pounds

**Fruit shape:** Flattened round

**Fruit color:** Pink red

**Plant type:** Annual

**Plant height:** 20 inches

**Plant width:** 3-4 feet

**Garden location:** Full sun

**Garden spacing:** Sow 3 seeds directly in garden soil/hill with a 2-3 foot spacing

**Length of time to harvest:** 100 days

**Closest comparisons on market:** 'Rouge Vif D'etamps,' 'Cinderella' and 'Shadow Moon' F1

**Disease tolerances:** PM tolerance

## **Pumpkin Pepitas F1** **AAS 2016 Edible Winner** **National Winner**

The newest All-America Selections award winning pumpkin, Pepitas, is a winner in both the decorative and culinary arenas. Pepitas is named for its hullless or naked seeds (pepitas) that lack the tough outer hull making them easier to eat either fresh or roasted. Pepitas are a delicious and nutritious treat, with many health benefits!

Each high yield plant produces numerous, uniform medium sized (9 – 12 lb) pumpkins on healthy, disease resistant vines. This confectionary type of pumpkin produces beautiful orange fruits that at maturity have decorative green stripes. What an interesting change of pace for your fall decorations.

Bred by Seeds By Design and W. A. Burpee

### **AAS® Winner Data**

**Genus species:** *Cucurbita pepo*

**Common name:** Pumpkin

**Fruit flavor:** Pale yellow flesh that can be eaten or baked

**Fruit size:** 12-14 inches

**Fruit shape:** Almost round

**Fruit color:** Yellow/orange with green striping

**Plant color:** Dark Green

**Plant type:** Annual

**Plant height:** 15-16 inches

**Plant habit:** Requires space has trailing vines

**Garden location:** Full sun

**Garden spacing:** 3-4 feet

**Length of time to harvest:** 90 days from sowing seed

**Closest comparisons on market:** Triple Treat, Kakai

**Pumpkin Super Moon F1**  
**AAS 2016 Edible Winner**  
**Regional Winner: Great Lakes and Southeast**

Love the look of white pumpkins for your fall holiday décor? Then you will love our first-ever white pumpkin AAS Regional Winner Super Moon F1. Our judges loved the nice, eye-appealing ghostly white coloration on the large, blemish-free round pumpkins. Grown for their size, up to 50 lbs, and their clean white color, these hardy plants are known for their early fruit development and vigorous growth. Their stems are tough, hardy, disease-resistant and unstoppable! When done decorating with these beauties, consider trying the yellow flesh for roasting or in your fall harvest soups.

**Squash Honeybaby F1**  
**AAS 2017 Edible Winner**  
**Regional Winner - Heartland**

Honeybaby is a very productive variety of winter squash producing numerous fruits on a compact plant. These shorter vines grow 2-3 feet in a semi-bush habit showing great garden vigor which results in healthier plants that resisted powdery mildew later into the season, especially in the Southeast. Short, wide fruits are slightly larger, sweet and nutty and more meaty than similar comparison varieties. Honeybaby is delicious steamed, baked or made into soups and stews. Plant as soon as soil temperatures reach 65 degrees to ensure maturity in 90-100 days.

Bred by Seeds By Design

## AAS® Winner Data

**Genus species:** *Cucurbita mushata*  
**Common name:** Winter Squash  
**Fruit flavor:** Nutty, sweet  
**Fruit size:** 6-7 inches

**Squash Sugaretti F1**  
**AAS 2017 Edible Winner**  
**Regional Winner - Southeast**

Sugaretti is a new spaghetti winter squash that prolifically produces a generous crop of mid-sized orange fleshed vegetables. These striped beauties are the perfect size for culinary gardeners who want to grow a great tasting, healthy fall treat on semi-bushy vines that spread only about two feet . The nutty sweet flesh (somewhat reminiscent of a sweet potato) can be used as a pasta substitute as well as for simple roasting or blended in soups. Determinate vining plants have good disease resistance to powdery mildew and produce fruits slightly earlier than other similar varieties. Sugaretti produces so many fruits that it's good their hard shells protect the flesh for a longer shelf life.

**Tomato Chef's Choice Bicolor F1**  
**AAS 2020 Edible Winner**  
**Regional Winner – Heartland**

**NEW!**

The first bicolor tomato in the Chef's Choice series is here! Indeterminate plants produce large 7-8 ounce flattened beefsteak fruits with beautiful pinkish red internal stripes within a yellow flesh. The lovely stripes extend to the base of the outer fruit skins. These heirloom looking tomatoes are as sweet as they are beautiful with a better flavor and texture than the comparisons. Gardeners will enjoy earlier maturity and more uniform fruits that hold up all season long, producing well into September in the Heartland. As with all the colors in the Chef's Choice series, each plant can produce about 30 fruits per season.

**Tomato Chef's Choice Black F1**  
**AAS 2018 Edible Winner**  
**Regional Winner – Southeast, Mountain/Southwest and West/  
Northwest**

---

And now there are six! This variety is the sixth color variation in the popular Chef's Choice tomato series. Chef's Choice Black is a beefsteak type tomato with a dark green/brown/black hue. AAS Judges reported vigorous, healthy plants with clean and uniform fruits that were early to set and had a meaty interior with great flavor. This hybrid boasts a prolific yield of 8-ounce fruits grown on strong, 5-foot indeterminate vines. You'll harvest 30 or more blemish-free fruits throughout the season from this disease-resistant plant with dark green leaves and well-behaved form. Grow the whole Chef's Choice series for a beautiful and unusually colorful tomato salad!

**Tomato 'Chef's Choice Orange' F1**  
**AAS 2014 Vegetable Award Winner**  
**National Winner**

'Chef's Choice Orange' F1 is a hybrid derived from the popular heirloom 'Amana Orange' which matures late in the season. Now you can experience the wonderful flavor of an orange heirloom tomato in only 75 days from transplant. Its disease resistance is an added bonus. 'Chef's Choice Orange' has a wonderful bright, almost neon, internal color and superior flesh taste and texture for an early maturing orange tomato. Excellent for soups and sauces because the intense color does not fade or discolor when cooked. Home chefs are going to love cooking with this variety as well as eating it fresh.

Bred by Seeds By Design

## AAS® Winner Data

**Genus species:** *Solanum lycopersicum*

**Common name:** Tomato

**Unique qualities:** Large flat beefsteak tomato with excellent, mild garden-tomato flavor. Good firmness. Great array of disease resistance, and is well adapted to grow in many regions. The best thing about this Tomato is the internal color – electric orange.

**Fruit size:** 5-6 inches, 9-12 oz.

**Fruit shape:** Flattened boat shape

**Fruit color:** Orange

**Plant type:** Annual, indeterminate tomato

**Plant height:** 5 feet

**Plant width:** 18-24 inches

**Garden location:** Full sun

**Garden spacing:** 15-18 inches

**Length of time to harvest:** 75 days from transplant

**Closest comparisons on market:** 'Carolina Gold' F1, 'Sunkist' F1 and 'Orange Wellington' F1

**Disease tolerances:** Tomato mosaic virus, Crack, Anthracnose, Fusarium wilt

**Tomato Chef's Choice Pink F1**  
**AAS 2015 Edible Winner**  
**Regional Winner (Southeast and Great Lakes)**

First we introduced Chef's Choice Orange as an All-America Selections Winner and now we have her sister, Chef's Choice Pink--another tasty beauty in beefsteak tomato category. Indeterminate potato leaf plants yield large (often more than one pound) fruits with sweet, meaty flesh. This hybrid is easier to grow than most beefsteaks so don't be timid, give it a try. The reward will be healthy disease-resistant plants and a large harvest of tasty, attractive pink fleshed tomatoes reminiscent of heirloom varieties.

Bred by Seeds by Design

## AAS® Winner Data

**Genus species:** *Solanum lycopersicum*

## Tomato Chef's Choice Red F1

**AAS 2018 Edible Winner**

**Regional Winner – Southeast and West/Northwest**

The fifth addition to the popular Chef's Choice tomato series is Chef's Choice Red which produces globe-shaped, tomato-red beefsteak type tomatoes. Tomato lovers and culinary gardeners will want to grow this firm-fleshed delicacy that has just the right balance of acid to sugar. AAS Judges raved about the prolific yield of the 8-ounce fruits that the strong, 5-foot indeterminate vines produced. You'll enjoy harvesting 30 or more scar-free fruits throughout the season from this disease-resistant plant with dark green leaves and well-behaved form. Grow the whole Chef's Choice series for a colorful harvest!

**Tomato Fire Fly F1**  
**AAS 2019 Edible Winner**  
**National Winner**

Similar to the Goldilocks story, this adorable newcomer is not as small as a currant tomato and not as large as a cherry tomato, but is a “just right” in-between size. The fruits produced are super sweet pale white to pale yellow round fruits less than 1 inch in size and weigh about 1/2 oz. Delicate, translucent skins offer a mild acid flavor that enhances the sweet taste. They’re small juicy fruits exploding with flavor, perfect for snacking and in salads. Indeterminate plants must be staked or caged as they grow upward to 5-6 feet and have good disease resistance.

[Bred by Seeds By Design Inc.](https://www.seedsbydesign.com/)  
(Click link for order contact)  
<https://www.seedsbydesign.com/>

**AAS® Winner Data**

- **Genus species:** *Solanum lycopersicum*
- **Common name:** Tomato
- **Fruit size:** ¾-1 inch round fruits, weigh about ¾ to 1 oz.
- **Yield:** 500+ fruits per plant
- **Color:** White to pale yellow
- **Plant height:** 5-6+ feet
- **Plant spread:** 2 feet
- **Plant habit:** Upright, requires staking
- **Garden location:** Full sun
- **Garden spacing:** 12-16 inches
- **Length of time to harvest:** 80 days from transplant, 100 days from direct sow
- **Disease resistance:** TMV, Crack, F, V
- **Closest comparisons on market:** Coyote and Snow White

## Watermelon 'Harvest Moon' F1 AAS 2013 Vegetable Award Winner

The first ever hybrid, triploid seedless watermelon to win a coveted AAS Award! Similar to the popular heirloom variety, 'Moon and Stars,' 'Harvest Moon' is an improvement in that it features healthy, shorter vines that produce medium-sized fruits and sweet, crisp pinkish-red flesh. 'Harvest Moon' retains the familiar dark green rind with yellow dots, but is seedless, earlier to ripen, higher yielding and better tasting. As one judge said, "What's not to like?!" This high-value item is great for bedding plant growers as a transplant item.

Bred by Seeds By Design.

### AAS® Winner Data

**Genus species:** *Citrullus lanatus*

**Common name:** Watermelon

**Unique qualities:** First hybrid triploid watermelon bred specifically for the Home Garden market.

**Note:** Triploids require planting with a diploid pollinator in a ratio of three triploids to one diploid and perform best if started indoors with a consistent soil temperature of 90 degrees F until germination.

**Fruit size:** 18 to 20 pounds

**Fruit shape:** Elongated round

**Fruit color:** Dark green rind with large and small yellow spots; flesh is red/pink

**Plant type:** Large vigorous spreading and trailing yellow spotted vines

**Plant height:** 15 inches

**Plant width:** 3-5 feet

**Garden location:** Full sun

**Garden spacing:** 3-5 feet

**Length of time to harvest:** 100 days from transplanting

**Closest comparisons on market:** 'Moon and Stars Red,' 'Moon and Stars Yellow'
