LIQUID ZEOLITE

ABOUT OUR ZEOLITE

ZeoOne Zeolite is a naturally formed mineral that has a unique microporous atomic structure with a strong negative charge.

During its formation the zeolite traps valuable trace minerals such as calcium, magnesium and potassium within its framework.

The zeolite's porous 'honeycomb' structure, stability and strong negative charge allow it to electro-magnetically trap and hold positively-charged particles, such as heavy metals and other toxins. In order to take on positively-charged ions and toxins, it discharges its beneficial trace minerals through the process that is known as cation exchange.

ZEOLITE HAS A ROLE IN:

- ELIMINATING TOXINS AND HEAVY METALS FROM THE BODY
- AIDING THE IMMUNE SYSTEM TO FUNCTION EFFICIENTLY
- INCREASES PROTEIN, MINERAL & VITAMIN ABSORPTION
- IMPROVING THE ABSORPTION OF NUTRIENTS
- REDUCTION OF THE SYMPTOMS ASSOCIATED WITH ALLERGIES
- RESTORES ENERGY

EASY - SAFE - AFFORDABLE **DETOX**
ZEONE TRUSTED & PROVEN
