

WindSpin™ Flag Assembly

Please assemble flag kit within 30 days of purchase to comply with Warranty Guidelines.

WHAT YOU'LL NEED

Poles & Spike

Other Mounting Options

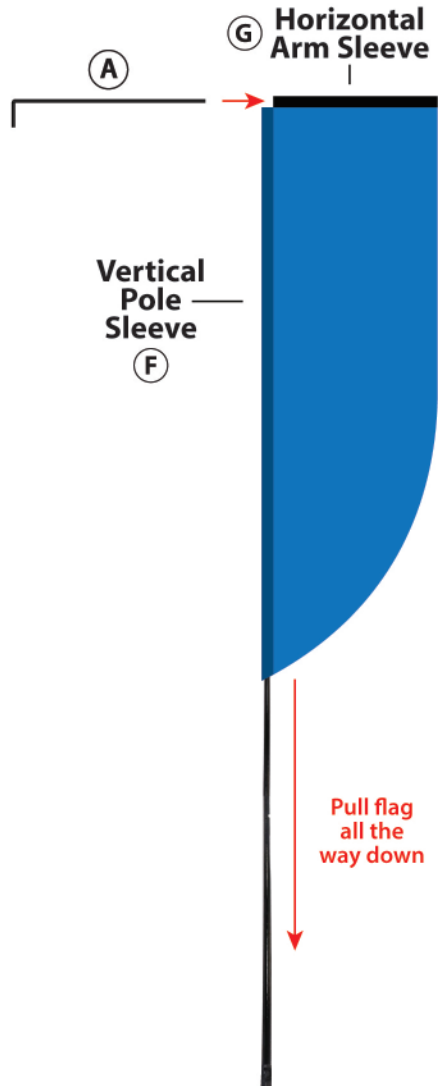

1 Assemble all three straight fiberglass poles (B, C and D) making sure they fit snugly together.

2 Slide the Arm Pole (A) through the Horizontal Arm Sleeve (G), then slide the connected poles you just assembled through the Vertical Pole Sleeve (F) in the WindSpin™ Flag.

STEP 1

STEP 2

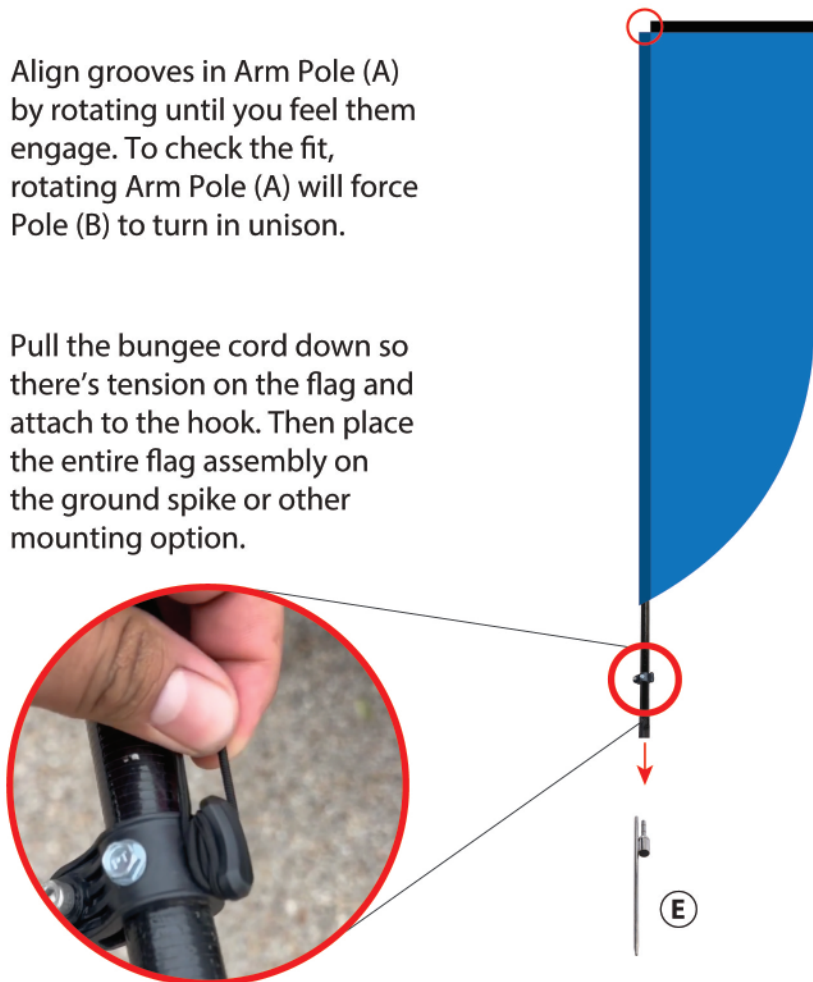

FINAL STEPS

3 Align grooves in Arm Pole (A) by rotating until you feel them engage. To check the fit, rotating Arm Pole (A) will force Pole (B) to turn in unison.

4 Pull the bungee cord down so there's tension on the flag and attach to the hook. Then place the entire flag assembly on the ground spike or other mounting option.

Connect Arm Pole
and Vertical Poles here

NOTE: Wrap the bungee cord around the hook several times to tighten as needed.
