

ozone
press

Ozone started with one idea: Socks shouldn't just be an accessory, they should be a work of art. From the first floral designs — still a consistent theme throughout the brand — Ozone socks have quickly blossomed into a range of original and unexpected colors and styles. Evolving over the years into a luxury brand, Ozone now features a wide variety of styles, including sheers, wools, angora and textured styles.

Ozone couldn't be prouder of the artful socks that have graced fashionable feet over the years, and that's never been more evident than in this showcase. Ozone Socks have walked NYFW, graced the pages of countless magazines, and have even been featured in an international campaign. Everyone is taking notice of Ozone Socks, are you?
