ROTAX[®] ENGINES

ROTAX 2-STROKE ENGINES

Heart-thumping power, lightweight design, proven reliability — E-TEC direct-injection engine technology delivers the most sought-after attributes in the snowmobile industry.

With E-TEC engine lineup you also get:

- Industry-leading fuel economy²
- Excellent oil economy
- Virtually no smoke or smell
- Light, linear throttle pull
- Automatic summerization process

NEW 850 E-TEC TURBO R

- 180 hp up to 8,000 ft¹
- World's most powerful factory-built 2-stroke turbo

850 E-TEC

- 165 horsepower¹
- Up to 19 mpg (12.3 L/100 km)²

ROTAX ACE™ 4-STROKE ENGINES

With the Advanced Combustion Efficiency (ACE) family of engines, BRP engineers optimized the combustion system, reduced mechanical friction, and freed intake and exhaust breathing. The result is the most efficient engines in snowmobiling. Not only are they efficient, they're a pleasure to operate and own. Very little maintenance is required; they run smoothly and produce a nice, solid — yet quiet — sound.

NEW 900 ACE TURBO R

- Rotax-designed turbocharger
- 180 horsepower¹
- Cable-activated throttle with reconfigured iTC

INTELLIGENT THROTTLE CONTROL

Standard on the ACE engines, the iTC™ system delivers a whole different snowmobiling experience.

- **Driving Modes:** A button on the console enables you to select one of three driving modes. Standard mode ensures a smooth start and linear acceleration; Sport enables full performance and quicker acceleration; ECO® limits top speed and acceleration rates for a more relaxed, fuel-conserving ride.
- **Finger Throttle:** The throttle block can be rotated forward for use as a finger throttle, if preferred. Great for changing hand positions on a long ride and for more control through bumps.

¹ Observed metric horsepower based on internal dyno test performed in optimal conditions.

² Data based on internal engineering trail testing.

Experience the advantage of XPS. Oil and care products engineered to extend the life of your ride, tested in the world's harshest conditions, and designed to optimize your vehicle's performance. Learn more at XPSlubricants.com

 9779143 • 265 US gal / 1,003 L
 9779144 • 330 US gal / 1,249 L
 The best choice for any BRP vehicle with a 4-stroke engine used in winter cold condition.

XPS SYNCHROMESH SYNTHETIC TRANSMISSION OIL

9779170 • 24 oz. / 710 ml
 Recommended for use in all Ski-Doo and Lynx synchromesh transmissions requiring 75W-140 API GL-5 gear oils.

SYNTHETIC GREASE SUSPENSION

9779163 • 14 oz. / 400 g
 Designed to work specifically with the components found in Can-Am and Ski-Doo vehicles suspensions. It is highly stable and offers optimal lubrication at both extreme cold and high temperatures while protecting suspension components from dirt and moisture, as well as corrosion under extreme washout conditions.

900 ACE ENGINES OIL FILTER

420956124.

XPS 4T 0W-40 SYNTHETIC OIL CHANGE KIT

9779254 • 900 ACE
 Ultra-convenient "all-in-one" oil change kit saves time and money. Includes XPS Synthetic Oil, oil filter, O-rings and washer.

HOW TO MEASURE

SIZING CHART

HEIGHT: without shoes, standing with heels and back against a wall.

HEAD: around your head, from the center of the forehead, above the ears and over the natural bump at the back of the head.

ARM LENGTH: let the hands hang down on the side in a slightly bent position. Measure from the center of the back of your neck, along the length of your arm, to the wrist.

CHEST: measure under your arm, around the fullest part of your chest.

WAIST: immediately below the lowest rib.

HIPS: across the fullest part of the seat.

INSEAM: without shoes, from crotch to the floor.

GLOVES: Measure palm width.

BOOTS: Foot length from heel to toe.

- For best results, have someone else take measurements.
- Measure body in underwear.
- Tape must be snug but not tight.
- If measurements fall between two sizes, order the larger size.

SYMPATEX KEY TECHNOLOGIES

PERFORMANCE

Re>Think Performance - Dynamic Breathability

In contrast to other membrane technologies, the poreless compact Sympatex membrane is based on a physical and chemical principle. The water-attracting (hydrophilic) part of the membrane absorbs the moisture from the body and emits it to the outside by evaporation. The water vapour molecules are transported outwards along the hydrophilic molecular chains. The molecular structure (hydrophilic components) of the Sympatex membrane swells in moisture and therefore provides space for water vapour transport and fast evaporation.

TECHNOLOGIES

OUR RIDING GEAR AND TECHNICAL WEAR ARE BUILT WITH ADVANCED TECHNOLOGIES THAT PROTECT YOU WITH WARMTH, WATERPROOFNESS, LIGHTWEIGHT AND BREATHABILITY.

PRIMALOFT®

A high-performance insulation with the full spectrum of benefits to brave the elements. Warmer, drier, softer and more compressible than any other synthetic insulation.

sympatex®

RPM/RPM MAX

Coatings that provide maximum waterproofness, windproofness and breathability.

RPM Max: All seams and logos sealed

RPM: Critical seams and logos sealed

YKK

We use the world's best - YKK zippers - recognized for quality and reliability.

REINFORCEMENT FABRIC

Often added to garment zones that need extra durability, such as arms, back hem, inner legs, and crotch for tough yet flexible comfort.

E LINQ CONNECTOR SYSTEM

Some of our Lynx jackets have provisions built in for a heated shield wire - riders can leave the wire in the jacket securely fastened and out of the way.

LYNX APPAREL LAYERING PIONEERS

1

Wearing properly layered clothing starts with a high-quality **base layer**.

2

The mid layer helps to regulate the body temperature.

3

Insulated layer. Add or adjust the warmth with an insulated layer. Insulated jackets protect from the elements with additional warmth.

4

Shell layer. Choose the outermost layer based on the temperature, the length of the trip and your riding style.

Enjoying the winter is often just a matter of dressing up. We at Lynx are pioneers in equipping the riders for demanding Nordic conditions.

Using high performance fabrics and insulation, the Lynx Tec-Layer product range offers a combination of moisture management, warmth, packability and protection in changing weather conditions and multiple activities. Keep yourself comfortable even during your toughest snowmobiling adventures!

GEARING UP FOR THE RIDE

”There’s no bad day, if you’re geared up right!

Some people may think that cold weather or lack of daylight is a reason to postpone your ride, but that’s not actually true. It’s all about gearing up right. Cold is not actually cold if you have right layers.

What I like to have is merino layers, thermo layers and sometimes even fleece, but I never go out without a protection. If you protect your head, remember to also protect your body.

Now that I’m all geared up, I’m ready to ride!

- Emma Kimiläinen, Lynx ambassador

PERFORMANCE

**WINTER'S
NOT A SEASON.
IT'S A LIFESTYLE.**

ACTIVE

The original Lynx Active range sees you through off-season, dialing up the technical details that keep your engine running all year round. You will stay comfortable and protected from the top of

the mountain down to the trails and in different activities. From jerseys to keep you dry and prevent overheating to lightweight, breathable and waterproof outerwear, you are ready to go!

Keep your engine running all year round!

When snow turns to slush and trails turn to tracks, it's time to train. In the gym. On the bike. Through the woods. Counting down the days to that first fresh fall. Muscles burning. Longing for the cool breeze on your face. You can almost feel it. Not long now. Winter is almost here.

ELINQ

As snowmobilers, we love the freedom our sleds bring us. It's addictive. And that's why we continue to add ways to find more of it in every ride.

eLinQ is an innovative solution that connects your heated gear and accessories to your snowmobile without adding more corded connections.

eLinQ combines your Lynx DESS tether into both a tether and a 12-volt accessory connection in one cord. A magnetic connector mounts to the sled next to the DESS post to provide the electric connection necessary to power any 12-volt accessory like heated shields, gloves, boots, and more.

FIDLOCK SYSTEM

FIDLOCK helmet buckles combine safety with single-handed use and comfort, even with gloves, for innovative head protection. The magnetic, automatic closing mechanism makes fastening a helmet as easy as possible for users. The single-handed use allows our helmet buckles for sports, work and other activities to be opened quickly and intuitively.
