

# Wireless Mouse

## PMW6007

Prolink PMW6007 Wireless Mouse comes with an ambidextrous design sculpted to an angle to provide maximum comfort for users' palms even after long hours of usage. Users are able to select and control their mouse sensitivity by simply clicking on the DPI button (800/1200/1600 DPI) located right below the scrolling wheel. Other features include the auto-sleep mode that conserves and extends the overall battery life and a high-precision optical sensor that works well on a various surface.

\*Actual battery life may vary based on usage and computing conditions.

Colours Available:

Black

Mint

White

## Key Features
