Principally and Proudly Manufactured in Taiwan

COMPANY OVERVIEW

Kingston prides itself on offering a comprehensive line of designer plumbing fixtures for kitchen, bath and utility. Our fixtures range from kitchen and bath faucets and sinks to matching plumbing trim. We offer air gaps, filtration faucets, console vanities, bathtubs and more. We design our fixtures in traditional and contemporary styles in 14 different finishes including standards like polished chrome, brushed nickel, and polished brass to the more exotic and trendy like brushed brass, matte black and naples bronze. With offices, warehousing and customer support in Chino, California, our products are readily available on order and meet the most stringent standards in the country. Find the exact fixture you are looking for, trendy or traditional, conventional or outlandish.

Kingston has developed its extensive and ever growing array of fixtures and accessories since our founding in 1998. We carefully source each of our products from reliable factories, many of which we have done business with for years. Our faucets and most of our fixtures come from Taiwan, and we use a single plating factory for all of our finishing. You can be confident that your bathroom faucet will match your shower and tub faucet, as well as your shower curtain rod, shower curtain rings, towel bars, toilet paper holder, and toilet tank lever - your kitchen faucet will match the disposal flange, and they can match your bathroom, too.

Our home offices, complete inventory warehousing, and customer service reside in Chino, California. This enables us to offer faster than typical fulfillment and low stress resolutions to any issue. From a DIY project that hits an installation challenge to a growing chain of showrooms in need of inventory fast, for any size build or design project in between, Kingston has your needs covered. Contact us to discuss exactly what you need, and we will set you up with the right person in our organization to take care of your project or business needs.

PRODUCT OVERVIEW

From collections like Concord, Kaiser, and NuvoFusion with contemporary, minimalist lines to the English Vintage, Essex, Tudor and Vintge collections with ultra traditional decorative lathe-work style, we offer the complete range. For eclectic tastes and spaces collections like Millenium and Paris offer a transitional hybrid of design elements to unify the space and create a statement.

We offer this range in up to 14 finishes and a number of dual tone options. We of course offer the traditional standards - Polished Chrome, Brushed Nickel, Oil Rubbed Bronze, Polished Nickel, and Polished Brass. Kingston also offers more trend oriented finishes including Matte Black and Brushed Brass, and we offer specialty finishes including Antique Brass, Rose Gold, Antique Copper, Naples Bronze, Brushed Gold, Antique Nickel, and Black Nickel. Nearly any item in our catalog can be special ordered in one of our finishes, if it is not available in our standard catalog offering.

Kingston's exceptionally low minimum order quantity - as low as single piece in some cases - and California-based inventory provides the ability to cater to boutique and specialty customers as well as to large-scale customers. Whether you need to provide a complete suite with trim for a designer remodeling a high end master bathroom for an individual client, or you need to supply an apartment builder with a highrise project, Kingston can provide a selection. We also offer specialized spec for larger orders, such as hotels and apartments that fall under particularly stringent code or want something unique for the property. Kingston also offers convenient online ordering through our specialized Trade Site. Contact your account manager or representative to find out more.
