NOTES:

Our recipe for entryway success starts with a few key ingredients!

Entryway artwork should be both stylish and functional. It should be large enough to make a statement, but not so large that it overpowers the space. And it should reflect your personal style while also complimenting the overall aesthetic of your home.

Adding decor accents makes the space look more sophisticated and pulled-together

Try looking for a piece of artwork that complements the colors in your entryway table

Layering a big piece with a smaller frame adds visual interest and depth
