**Note:**

- Time and Temperature are adjustable whenever oven is working or closed of working.
- Lamp and Convection are adjustable whenever oven is working or closed of working.

**Setting Up Your Oven Toaster Griller**

Read all instructions included in this user's guide.  
Check all the accessories in the carton and remove all racks and pans & wash in hot water or dishwasher

After re-assembling your oven, we recommend to run it maximum temperature for approximately 15 minutes to eliminate any packing oil that may remain.

**Installation & Use of Your Digital OTG**

Place your oven on a stable work surface. Allow a free flow of air around your appliance. The oven must have a minimum of 10cm of space on either side, including the back, and 30 cm top clearance. Unwind the power cord and plug it into the wall outlet. Before using your oven for the first time, we suggest that you run the oven while empty at a temperature of 230°C for about 15 minutes in order to get rid of the “new smell.”

**Using Your Oven**

- Set the temperature according to the dish that you are going to cook.
- Set the corresponding temperature button by turning it clockwise to select the appropriate temperature (from 65°C to 230°C) for the dish you are going to cook.

**Toast Function**

Please note that the “**Toast**” setting uses all of the heating elements. The large capacity oven allows you to toast 4 to 6 slices of bread, 6 muffins, frozen waffles or pancakes. When only toasting 1 or 2 items, place the food in the centre of the middle rack.

Step 1. Open the door, place the bread (4 or 6 slices) into the oven and close the door.

Step 2. Press the “Mode” button; turn the “Selection” knob to choose Toaster function. the browning shade indicator (1-3) will appear on display. Choose the color level as you ask.

Step 3: Temperature 230°C is not adjustable. Time is acquiescent according to bread color level

As below picture ( See Functions details sheet as below ).

Step 4: Press button “START/CANCEL “ to work.

## Note: Special functions to this Digital Oven

1) Display will go to sleep mode if oven is not in use more than 10 minutes. to operate again just push any button.

2) Memory function: This oven with intelligent memory function. For example, your last cooking Pizza was finished, and now your cooking Toast is finished too, you want to start next cooking Bagel, the display will show Pizza information (temperature, time) automatically.

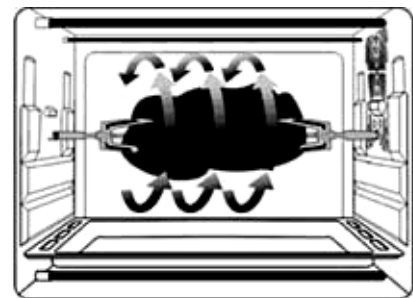

## How to Use The Rotisserie

### Inserting the Rotisserie

For the rotisserie function, the roasting spit is provided.

The roasting spit can hold up to 3 kilograms, but for chicken, this model only can bake about 1kgs

since the limited space.

### Installing the Rotisserie spit:

Insert the rotisserie spit into the holes provided for this purpose, holes "A" and "B" as shown in the diagram below. Then place the crumb tray below to collect the juices or oils.

### CAUTION:

Always use the rotisserie handle when removing the rotisserie spit so that don't burn yourself.

Be careful not to burn yourself when removing cooking juices or other liquids from the oven.

## Oven maintenance

Always unplug the appliance and allow it to cool completely before cleaning or moving it.

Clean the tray, the grill, and the tray handle after each use.

Clean the interior of the oven and all of the removable parts with a mild, non-abrasive cleanser after each use. Rinse and dry carefully.

Clean the glass exterior of the oven door with glass cleaner or mild detergent and a damp cloth. Do not use abrasive cleansers or pads that could scratch the surface coating of the appliance.

Rinse and dry thoroughly with a clean, dry cloth. Let the oven dry completely before closing the door.

To facilitate cleaning: auto clean the walls after a greasy meal by heating the oven to the maximum setting while empty, with the door closed for a period of 10 minutes.

If you need to store the oven, unplug it, allow it to cool, and clean it before placing it in the box. Store it in a cool, dry place. Never store the unit when it is still hot.

Never wrap the power cord around the appliance. Do not put any stress on the power cord at the place where it is attached to the unit. It could become damaged and break.

## Important Safeguards

When using electric appliances, basic safety precautions should always be followed, including the following:

Do not touch hot surfaces. Always use handles or knobs.

Close supervision is necessary when any appliance is used by or near children.

To protect against electric shock, do not immerse cord, plug or any parts of the oven in water or any other liquids.

Do not let cord hang over edge of table or counter, or touch hot surfaces.

Do not operate appliance with damaged cord or plug or after the appliance malfunctions or has been damaged in any manner. Return appliance to its authorized agent for repair, as special purpose tools are required.

The use of accessory attachments not recommended by the appliance manufacturer may cause hazard or injury.

Do not place on or near a hot gas or electric burner.

When operating the oven, keep at least four inches of free space on all sides of the oven to allow for adequate air circulation.

To disconnect, turn the time control to UFF, then remove the plug. Always hold the plug, and never pull the cord.

Extreme caution must be used when moving a drip pan containing hot oil or ether hot liquids.

Use extreme caution when removing the tray, racks or disposing of hot grease or other hot liquids.

Do not clean the inside of the oven with metal scouring pads, pieces can break off the pad and touch electrical parts, creating a risk of electric shock.

Oversized foods or metal utensils must not be inserted in a toaster oven as they may create a fire or risk of electric risk.

A fire may occur if the oven is covered or touching flammable material, including the curtains, draperies, walls, and the like, when in operation. Do not store any item on top of the appliance when in operation.

Extreme cautions should be exercised when using cooking or baking containers constructed of anything other than metal or ovenproof gloves.

Be sure that nothing touches the top or bottom elements of the oven.

Do not place any of the following materials in the oven: cardboard, plastic, paper, or anything similar.

Do not store any materials other than manufacturer's recommended accessories in this oven when not in use.

Always wear protective, insulated oven gloves when inserting or removing items from the hot oven.

This appliance is OFF when the Timer Control button is in the "OFF" position.

Do not use outdoors.

Do not use appliance for other than intended use.
