NAUTICAL STEEL

SINCE 1997

Option 5: Tensioner & Stud to Tensioner & Stud

	cable size available	4mm	5mm
	thread size	M6	M6

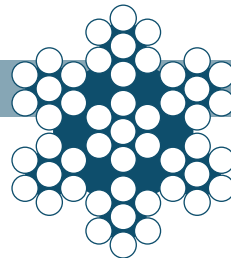

STAINLESS STEEL CABLE GRADE 316

STIFF CABLE

1 x 19

not to be used around 90 degree bend

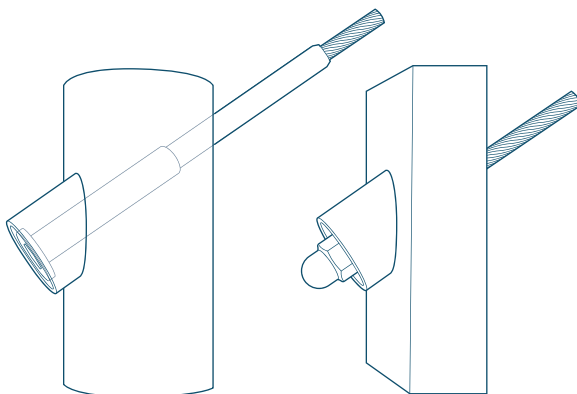

SEMI-FLEXIBLE

7 x 7

can be used around 90 degree bend

STAIRCASES

Angled Post fittings are available in 34 degrees for 38mm round tube or for flat posts.

All fittings and cables are Grade 316 Stainless Steel.

If you have a staircase :

- › Angled Post fittings are required to help your fittings sit at the correct angles of the staircase.
- › Cable Holes can be drilled at stair angle and fittings will terminate at angle

BALUSTRADE TECHNICAL INFORMATION:

- › Nautical Steel makes cables up to length – please provide your outside post to outside post measurements.
- › Hydraulic swaging tool available for hire.
- › Per building regulations, balustrades have to be 1000mm high from top of hand rail to floor.
- › Spaces allowed between each cable are 100mm.
- › Span between intermediate posts can be between 1200mm to 1500mm.
- › Corner posts can be a single post, or can be offset with 2 posts.

NAUTICAL STEEL ALSO SUPPLIES THE FOLLOWING CABLE SYSTEMS:

- › Architectural systems
- › Green screens
- › Arti-Teq® hanging systems
- › Signage and Banner cables
