How to Customize Your Organic Wool Pillow

Follow the steps below to personalize the loft and firmness of your pillow to your liking…

You'll need: - The bag your pillow arrived in
                        - A basket, bucket or second person (place bag into basket to hold it open)
                        - A vacuum cleaner (in case some spills out)

Steps to help you **remove** wool pearls from your pillow to adjust the height:

- Open up the outer protective cover of the pillow and pull it half way down the pillow.
- Hold the pillow with the opening side upward
- Shake pillow to move the fill down and away from the top opening of the pillow
- Open the zipper. If wool gets caught in the zipper, gently pick it out with your fingertips
- Put your hand in the pillow and remove in bunches as needed
- Pull the wool gently inside the pillow to fill out the empty space to the edges of the pillow and to add loft
- Close the zipper and fluff the pillow from the outside as you would a normal pillow

Steps to help you **add** extra wool pearls back into your pillow to adjust the height:

- Open the zipper, take a handful of your extra wool and insert it back into your pillow
- Gently pull apart and evenly re-work the inside pearls until you get the loft and consistency that you need
- Close the zipper and fluff the pillow as you would a normal pillow

Always handle your wool gently to avoid causing it to felt. Your wool pillow will remain fluffy if you handle it with a soft touch.

To naturally clean and refresh your wool pillow you can remove the outer cover and set the pillow out in the sun.
