

## FEARLESS<sup>®</sup>

### CLINICAL APPLICATIONS

- Supports male and female libido
- Prevents body's blood flow restriction
- Produces nitric oxide
- Increases sexual desire

## DISCUSSION

Regen Labs Fearless is a sexual health complex made of Icaria (Horny Goat Weed), Black Ginger Extract, and Panax Ginseng. The combination of these ingredients works to support male and female Libido.

Icaria (Horny Goat Weed) is a herbal supplement common in traditional Chinese medicine. It can treat many diseases, including coronary heart disease, osteoporosis, rheumatism, and even impotence. It displays atheroprotective effects which help prevent blood flow restriction throughout the body.

**Black Ginger Extract**, otherwise known as "Kaempferia parviflora" has been used for over a thousand years in Thailand. It can help with allergies, diarrhea, diabetes, and, again, impotence. It can also display aphrodisiac qualities by increasing sexual desire, attraction, pleasure, and behavior.

**Panax Ginseng** is a herbal supplement. Ginsenosides and gintonin are the two significant compounds that work as its active ingredients. It has been used for centuries because it has anti-oxidant and anti-inflammatory properties. More importantly, it can produce nitric oxide which can help beat erectile dysfunction. Studies have shown that participants who took 350 milligrams of ginseng four times a day for 8 weeks discovered that their sexual performance increased.

## NUTRITION

SUPPLEMENT FACTS		
Serving Size: 1 Capsule		
Servings Per Container: 30		
	Amount Per Serving	%DV
<b>Fearless</b>	<b>700mg</b>	*
Panax Ginseng 80%
