

A-STAR MUSIC Glockenspiel

Educational products and accessories are our passion at A-Star Music. With our huge range of handheld percussion and early years products, our mission is to bring affordable entertainment to classrooms, workshops and households.

A-STAR MUSIC

How to Play

- 1 Hold a beater in each hand, between your index finger and thumb.

- 2 Strike the centre of the bar with your beater and release immediately after striking.

- 3 Aim to keep the beater around 5cm above the bars, to enable you to be precise when chiming your notes.

Did you Know?

The word glockenspiel is a German word consisting of two parts "glocken" - bells - and "spiel" - to play.

The glockenspiel is different to the xylophone as its bars are made out of metal instead of wood.

You can hear the glockenspiel in rock band Radiohead's 1997 single "No Surprises".
