

DRW 7749

For the premium ribbed beef market Rebelski is the most authentic deep, shiny red internal and external colored tomato. Because of its ribbed fruit shape and high amount of trusses it is a very reliable summer variety, with firm fruit, excellent shelf life and deep short calyx.

- Due to its beautiful ribbed shape and the high number of bunches per stem, this breed is one of the most cultivated varieties in the Netherlands and Belgium. If grafted, Rebelski should be pinched on the second true leaf and it is not recommended to pinch on cotyledons.

Features

- Authentic deep red ribbed tomato
- Unique flat shape
- High truss development
- Intermediate Powdery mildew resistance
- Firm fruits with deep short Calyx
- Strong plant behavior

Advantages

- One of the most requested products by retail market with great taste
- Early production and early to market
- Easy biological control
- Suitable for lit crops

Disease Resistance

HR **ToMV:0-2/Pf:A-E/Fol:1,2/For/Va:1/Vd:1**

IR **On**

Disease Resistance Key

- **Fol = Fusarium wilt**
- **For = Fusarium crown and root rot**
- **On = Powdery mildew**
- **ToMV = Tomato mosaic**
- **Va = Verticillium wilt**
- **Vd = Verticillium wilt**

Characteristics

SIZE	Large
EXTERNAL COLOR	Red
SHAPE	Flat Ribbed Round
AVERAGE WEIGHT	200-230 grams
HARVEST METHOD	Loose
HARVESTING SEASON	Lit CropYear Round
JOINTLESS	No
PLANT TYPE	Indeterminate
VIGOR	Very High

HR = High Resistance. IR = Intermediate Resistance. To find out more about disease resistance and the applicable levels of disease resistance, https://www.worldseed.org/wp-content/uploads/2017/05/Definition_on_reaction_plants_to_pests_2017_final.pdf.

Performance may vary from location to location and from year to year, as local growing, soil and climatic conditions may vary. Growers should evaluate data from multiple locations and years whenever possible and should consider the impacts of these conditions on the grower's operation. Any recommendations provided on this webpage are based upon observations and feedback received from a limited number of trials and geographies. These recommendations should be considered as one reference point and should not be substituted for the professional opinion of agronomists, entomologists or other relevant experts evaluating specific conditions.
