

FORONTI

For vegetative growers needing an attractive red colored beef tomato with intermediate resistance to Powdery Mildew, Foronti tomato hybrid provides a high total production potential with a high average fruit weight.

- Foronti has potential to deliver high yield production under high light levels and hot summers.

Features

- Strong plant aspect
- Intermediate Resistance to powdery mildew
- Beautiful attractive red colored fruits with high round shape
- Provides early production
- Provides opportunity for biological control

Advantages

- This product is appreciated at retail and can support the early market

Disease Resistance

HR **ToMV:0-2/Pf:A-E/Fol:1,2/For/Va:1/Vd:1**

IR **On**

Disease Resistance Key

- **Fol = Fusarium wilt**
- **For = Fusarium crown and root rot**
- **On = Powdery mildew**
- **ToMV = Tomato mosaic**
- **Va = Verticillium wilt**
- **Vd = Verticillium wilt**

Characteristics

SIZE	Beef
EXTERNAL COLOR	Red
SHAPE	Round
AVERAGE WEIGHT	250-300 grams
HARVEST METHOD	Loose
HARVESTING SEASON	Year Round
JOINTLESS	No
PLANT TYPE	Indeterminate
VIGOR	Very High

HR = High Resistance. IR = Intermediate Resistance. To find out more about disease resistance and the applicable levels of disease resistance, https://www.worldseed.org/wp-content/uploads/2017/05/Definition_on_reaction_plants_to_pests_2017_final.pdf.

Performance may vary from location to location and from year to year, as local growing, soil and climatic conditions may vary. Growers should evaluate data from multiple locations and years whenever possible and should consider the impacts of these conditions on the grower's operation. Any recommendations provided on this webpage are based upon observations and feedback received from a limited number of trials and geographies. These recommendations should be considered as one reference point and should not be substituted for the professional opinion of agronomists, entomologists or other relevant experts evaluating specific conditions.
