

# TOUCHE

For growers that rely on high fruit quality through harsh summer conditions, Touché is a uniform, high yield potential beefsteak tomato featuring Powdery Mildew resistance

- Touché is higher yielding than Torero and is known for its high quality fruit retention early in the season and can be grown grafted or non-grafted in high tech glasshouses

## Features

- Developed in Ontario
- Grown grafted or non-grafted
- Better responses under glass vs plastic
- Improved quality under harsh summer conditions

## Advantages

- Fewer issues of fruit fall under low light levels
- Labor friendly

## Disease Resistance

HR **ToMV:0-2/Pf:A-E/Fol:1,2/For/Va:1/Vd:1**

IR **On**

### *Disease Resistance Key*

- **Fol = Fusarium wilt**
- **For = Fusarium crown and root rot**
- **On = Powdery mildew**
- **ToMV = Tomato mosaic**
- **Va = Verticillium wilt**
- **Vd = Verticillium wilt**

## Characteristics

SIZE	<b>Large</b>
EXTERNAL COLOR	<b>Red</b>
SHAPE	<b>Round-Ribbed</b>
AVERAGE WEIGHT	<b>270 grams</b>
HARVEST METHOD	<b>Loose</b>
JOINTLESS	<b>No</b>
PLANT TYPE	<b>Indeterminate</b>
VIGOR	<b>High</b>

---

**HR = High Resistance. IR = Intermediate Resistance.** To find out more about disease resistance and the applicable levels of disease resistance, [https://www.worldseed.org/wp-content/uploads/2017/05/Definition\\_on\\_reaction\\_plants\\_to\\_pests\\_2017\\_final.pdf](https://www.worldseed.org/wp-content/uploads/2017/05/Definition_on_reaction_plants_to_pests_2017_final.pdf).

Performance may vary from location to location and from year to year, as local growing, soil and climatic conditions may vary. Growers should evaluate data from multiple locations and years whenever possible and should consider the impacts of these conditions on the grower's operation. Any recommendations provided on this webpage are based upon observations and feedback received from a limited number of trials and geographies. These recommendations should be considered as one reference point and should not be substituted for the professional opinion of agronomists, entomologists or other relevant experts evaluating specific conditions.
