TOUCH & SPEED

TOCCO 2

Tocco II redefines touch and takes the shoe to the next level. Attention to the detail and the quest to deliver enhanced comfort and performance have been the focal point for this shoe.

The target customer remains as previous. Whether it's the creative midfielder or the ball playing defender we know there is a player who covers greater distances and has more touches on the ball. Insight tells us this player wants the comfort, durability and stability of a leather boot.

Next level touch has been achieved by introducing an 'Optima' K-leather upper that increases grip on the ball by up to 69% compared to conventional K-leather.

'D30 Zero' impact control technology on the medial instep ensures a great first touch and close control without compromising power.

Our Pebax Powered Control+ outsole ensures all this effort isn't wasted by delivering great grip whilst the wishbone technology provides maximum energy return to make covering those greater distances easier.

VELOCITA 6

The Velocita 6 is built for the player whose game is about speed. Designed to fit like a second skin the boot provides a snug fit whilst allowing the freedom of movement the foot requires during rapid motion.

A 'Vent Knit' inner sock hugs the foot to provide the fit and support that speed players require whilst it's elastic properties provide flexibility during movement.

A 'V frame' support cage is thermo-bonded to the inner sock to provide additional support where it's needed during extreme movements (acceleration/deceleration/cutting/cross cutting).

The 'Speed Mesh' outer skin gives an extra layer of protection and enhances grip to make sure the hard work getting to the ball first isn't in vain.

Our Pebax Powered Sprint+ outsole features a unique stud configuration designed to give maximum traction for speed in all directions.

TOCCO 2

Technical Overview

Tocco 2 takes touch to the next level. Building on the success of the first generation we continually look for innovative solutions to enhance the players performance whilst also understanding our impact on the environment. More Control + More Grip+ More comfort = Better Touch. Welcome to Tocco 2

D3O
ZERO

More Control. The D3O Zero Medial control zone ensures a great first touch. It's shock absorbing properties cushion the ball upon impact whilst it stiffens at higher velocities to ensure power isn't compromised when striking the ball. Made from recycled surplus material D3O Zero uses innovative manufacturing processes to reduce waste.

OPTIMA
by CM
THE ULTIMATE TOUCH

More Grip. Optima super soft 'K' leather features micro-embossed grooves for improved grip to ensure the ball goes exactly what you want it to. The grooves in the surface of the leather increase the level of friction between the boot and the ball which results in more grip.

More Comfort. A tech mesh support cage wraps around the heel to give extra support and protection. Combining a knitted baselayer with a micro fine TPU surface layer ensures both comfort and durability are covered.

More Comfort. The 360° compression sock allows easy entry and wraps around the foot for a snug fit. The engineered rib is designed to provide support whilst allowing the necessary freedom of movement for the vital joint.

PEBAX
POWERED

The dual density 'Pebax Powered' Control* outsole features 'wishbone' technology. This dual density construction means we can control the level of stiffness throughout the sole. The unique wishbone configuration enables us to provide rigidity in the rear and midfoot sections and flexibility in the forefoot to deliver maximum energy return.

DESIGN INSPIRATION

FOLLOW THE FOOT.

By studying the biomechanics of the foot during rapid movements (acceleration, sprinting, cutting, cross cutting, deceleration) we can determine that the shape is constantly changing. Modern football boots tend to be made from lightweight synthetics that have little or no elastic properties and therefore restrict this movement. This in turn hinders performance and creates discomfort.

FIT, FORM, FAST.

The Velocita 6 combines the need for freedom of movement with the durability, protection and grip that footballers require. The new upper features a 'Vent Knit' inner sock that hugs the foot to provide the support that players desire whilst allowing the necessary freedom of movement that science dictates is required. A unique 'V-Frame' is then thermo-bonded to the inner sock to provide additional support during extreme movements. A textured 'Speed Mesh' outer layer provides grip and protection against the elements.

POWERED BY PEBAX.

The Pebax Powered 'Sprint+' outsole with its unique stud configuration is designed to give maximum traction in all directions.

SPEED MESH

Speed mesh supports the foot whilst textured surface provides grip in all conditions

TOE GUARD

TPU toe guard improves durability

V-FRAME

VENT KNIT

Vented, water-resistant, adaptive knit baselayer forms around the foot, providing a bespoke fit from first wear

SPRINT+ OUTSOLE

Pebax Powered Sprint+ Outsole combines angular and conical studs to provide ultimate traction in all directions

VELOCITA 6

FEATURES & BENEFITS

V-FRAME

Support cage ensures support and stability for a locked down fit.

VELOCITA 6 OUTSOLE

Lightweight Pebax outsole features unique combination of conical and specially shaped studs to ensure maximum grip and traction for speed in all directions.

STUD POSITION

SALA Z

Technical overview

Working with our licensee partners in Brazil we are pleased to introduce the Sala Z Pro as our best level Futsal shoe. In addition to this we will also be offering a mid-price point level Sala Z Liga.

This style has been developed by DASS our Brazilian licensee based on player insight and performance analysis in the home of Futsal.

We will be looking to offer this shoe to the global licensee network and will be looking to launch the shoe in Spring/Summer 2022.

The Sala Z is designed for players looking for a lightweight shoe that provides stability and comfort.

A leather forefoot provides durability and a great touch whilst a suede toe guard provides additional protection.

Mesh panels in the midfoot provide breathability whilst fusion welded TPU overlays add additional support.

A three sole construction consisting of compression moulded EVA insole, midsole and a soft rubber outsole provides great shock absorption and grip.

The Customer waives any right it might otherwise have to rely on any term endorsed upon, delivered with or contained in any documents of the Customer that is inconsistent with these Conditions.

- 1.3 The Order constitutes an offer by the Customer to purchase the Products in accordance with these Conditions. The Order shall only be deemed to be accepted when Outerstuff notifies the Customer in writing that it has received the Order ("Confirmation of Receipt"), at which point the Contract shall come into existence. The Order may not be cancelled or amended once Outerstuff has issued the Confirmation of Receipt.

- 2.3 If Outerstuff fails to deliver the Products in accordance with the above, its liability shall be limited to the costs and expenses incurred by the Customer in obtaining replacement Products of similar description and quality in the cheapest market available, less the price of the Products (subject to the further limitations set forth in clause 9.3 below). Outerstuff shall have no liability for any failure to comply with the foregoing delivery terms if and to the extent that such failure is caused by a Force Majeure Event or the Customer's failure to provide Outerstuff with adequate delivery instructions or any other instructions that are relevant to the supply of the Products.
- 2.4 Any price quoted by Outerstuff (including in any price list and/or Confirmation of Receipt) does not include the cost of delivery or transportation, unless otherwise explicitly stated in the Confirmation of Receipt or agreed in writing with Outerstuff.

- 6.2 The Customer undertakes that at no point, whether during the term of this Contract or any time thereafter, shall it do anything to prejudice or damage Outerstuff's ownership of, interest in or rights to use (in each case as applicable) the Intellectual Property Rights in the Protected Materials. The Customer undertakes and agrees that it has no right to and shall not (nor directly or indirectly allow, permit or enable any third party to) copy, adapt, reverse engineer, decompile, disassemble, modify or use any Protected Materials in whole or in part other than in accordance with this Contract or Outerstuff's express prior written consent.
- 6.3 The Customer shall comply with all rules for the use of the Protected Materials issued by Outerstuff (including those set out in any branding manual issued by Outerstuff whether issued on its behalf or on behalf of any Brand Owner).

- (c) the Customer suspends, threatens to suspend, ceases or threatens to cease to carry on all or a substantial part of its business.
- 8.2 On termination of the Contract for any reason: (a) the Customer shall immediately pay to Outerstuff all of Outerstuff's outstanding unpaid invoices and interest; and (b) Outerstuff shall have the right to cancel any Orders for Products placed by the Customer before termination if delivery would fall due after termination, whether or not such Order has already been accepted.
- 8.3 Termination of the Contract shall not affect any of the Parties' rights and remedies that have accrued as at termination, including the right to claim damages in respect of any breach of this Contract that existed at or before the date of termination. Any provision of the Contract that expressly or by implication is intended to come into or continue in force on or after termination (including clauses 5.3 and 6 to 12) shall remain in full force and effect.

12. **GENERAL**
- 12.1 **Force Majeure.** Neither Party shall be in breach of the Contract nor liable for delay in performing, or failure to perform, any of its obligations under this Contract if such delay or failure result from a Force Majeure Event. In such circumstances the affected Party shall be entitled to a reasonable extension of the time for performing such obligations. If the period of delay or non-performance continues for ninety (90) days, the Party not affected by the Force Majeure Event may terminate this Contract by giving thirty (30) days' written notice to the affected party.
