Methenolone Enanthate - (Bioniche Pharma Prima-Med) - Everything you should know!!! Injectable steroid like Primobolan Dept is producing the weaker effect. It is a basic steroid that comes with a predominantly anabolic effect. This steroid is similar to the Testosterone Enanthate, which is preferred by professional athletes. Description : Primobolan - Methenolone Enanthate is a mild anabolic with a minimal chance of typical steroid side-effects. Usual dosage for Primobolan is 200-400 mg per week, women use half the mens dosage Primo is not a steroid one would use when attempting to pack on the pounds. From taking about the mood swings, brain fog, joint pains, insomnia, not being able to do your

job to crawling skin (fasciculation💎s). I see far more women with mood issues and brain fog than hot flushes. Low motivation is also a huge issues. Women need shows like this to educate and empower. Prima-Med Methenolone Enanthate Bioniche Pharma Primobolan Depot (Methenolone enanthate) is the injectable version of the steroid methenolone and, although it produces a weaker effect than Deca-Durabolin it is a very good basic steroid whose effects are predominantly anabolic. PRIMA-MED . COMPOSITION. Each ml of product contains: Methenolone Enanthate 100 mg. PRODUCT DESCRIPTION. Methenolone enanthate is a synthetic long- acting anabolic steroid.
