ABOUT US

Thank you for your interest in our cookvision products. cookvision is a family business owned by the Rommerskirchen family and part of the B/R/K group. For over 30 years we have been developing and producing innovative products around the process of cooking with a focus on cook and steamware.

During this time we have registered many patents and received awards. For a long time we have developed and produced exclusively for well-known brands worldwide.

With nesto we now want to go our own way and start with the probably most compact and functionell stainless steel cookware in the world **"cookvision nesto"**.

COOK
VISION by B/R/K

Peter Rommerskirchen
CEO

At the beginning of 2023, the nesto - cooking system was awarded the Kitchen Innovation Award.

cookvision stands for

- Individual technical solutions
- Innovative design + functions
- Permanent quality controls
- International certifications and patents

HIGH QUALITY INTELLIGENT COMPACT

nesto is maximally space-saving!

nesto is designed so that all pots and pans can be stacked inside each other without noticeably increasing in height. Even elements of the same size do not pose a problem.

Stainless steel pots and pans with removable handles

nesto is a first-class cookware series that, thanks to intelligent design, requires much less storage space than normal cookware, our entire range is suitable for all types of stoves.

An important question:
What distinguishes professional cooking equipment from hobby tools ?
The raw materials and the workmanship of course !

COOKING AT PROFESSIONAL LEVEL

For the nesto series, we only use high-quality 18/10 chrome-nickel stainless steel.

The pots and pans are equipped with an extra strong thermo-sandwich bottom, consisting of a thick aluminum core and a magnetic stainless steel bottom plate.

The bottom is pressed with a 1200 to. press to impact the pot and pan bodies in a non-porous manner. This guarantees that the bottoms do not bend even under extreme heat and thus ensure optimum heat distribution and heat storage.

FORM FOLLOWS FUNCTION

nesto
series

nesto lids have a steam outlet and thus direct the steam in a controlled and efficient manner into Downdraft ventilating hobs, where cooking odours, fumes and grease are removed, this increased efficiency reduces the power needed for extraction and of course the noise. The different pot sizes have no influence.

The fastening of the lid underside is designed in such a way that the lids fit together in a tailor-made, non-slip manner. In addition, a clever fastening concept and a seal prevent water from penetrating under the lid.

The lid can simply be placed on the handle and pouring rim to drain.

POT LID

Tight-fitting silicone rim with targeted steam outlet ideal also for Downdraft fume cupboards

foldable lid handle = space-saving and non-slip, stackable

nesto lids are available in blue and black

All nesto pans and pots are oven-safe (without handle) up to 260°.

Thick encapsulated thermal base for optimum heat distribution and heat retention

Suitable for all types of cookers

RECOATING AND SUSTAINABILITY

COOK[®]
VISION **nesto**
ITS NEW.

Despite many advertising promises from various suppliers - there is no non-stick coating that lasts a lifetime! Even if a pan is treated with care, it can get scratched at some point and the non-stick effect wears off. This can be between 3 to 10 years or more, depending on the stress.

For cookvision nesto pans, we use very high-quality, multi-layer coatings from leading manufacturers.

It is estimated that 40 million pans a year are thrown away in Europe alone, and that is only because the coating no longer works properly. This is an enormous waste of raw materials and energy.

That is the option at cookvision:

We will take back nesto pans that no longer function properly at any time and promptly deliver a new pan at a significantly reduced special price!

The returned pan is sandblasted, ground, polished and completely recoated.

That's what we mean by sustainability!

GOURMET LID

Splash guard lid
with condensation water collecting

- crispy frying
- clean cooking and working surface
- easy cleaning in the dishwasher

Condensed water flows down the side of the lid and is collected in the rim of the lid. So nothing drips into the fat and the fried food is crispy on both sides.

Gourmet lid
for a perfect fit on all pans

Size	Art. no.
ø 24 - 28 cm	• 604 2410 blue
ø 24 - 28 cm	• 614 2410 black

Tight-fitting silicone rim with a directional slot, ideal for use with a Downdraft venting hob

KEEP FRESH

COOK[®] VISION **nesto**
ITS NEW.

The keep-fresh lids are made of high-quality plastic and have a patented silicone vacuum valve, which seals the contents airtight and protected from moisture and germs.

Food in the fridge stays fresh for longer.

ø 20 cm	605 2000

VITESSE - STEAM COOKER - LID

COOK[®] nesto
VISION ITS NEW.

Suitable for all 24 cm nesto pots

Boiling, pressure cooking and steaming

with a single pot. With the VITESSE lid, cookvision is opening up a completely new product category that combines intelligent, safe technology, top quality and exceptional design. The VITESSE creates a slight overpressure, but the patented system allows it to be opened and closed during cooking.

Cooking as usual - only faster and healthier

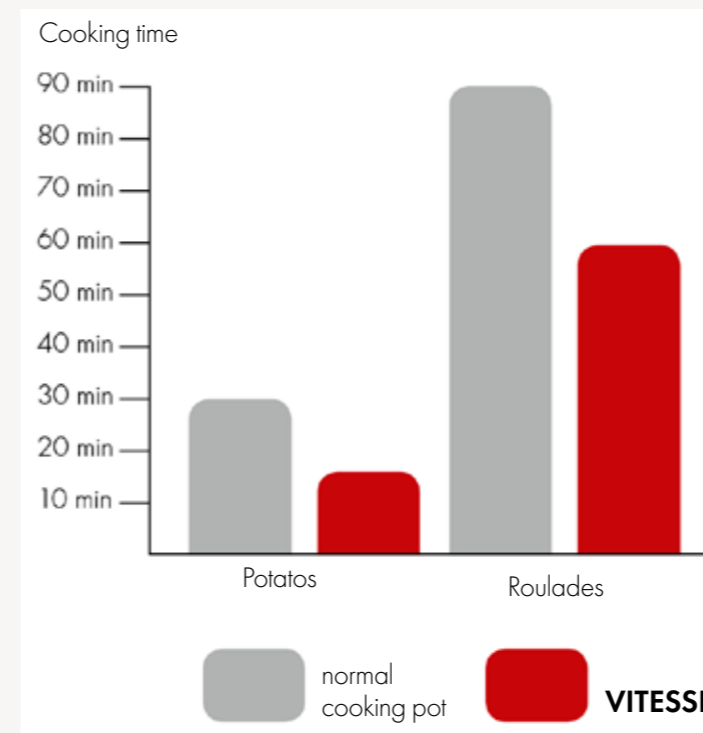

With the VITESSE, anyone can start cooking as usual as the handling is simple and self-explanatory, you should only check the cooking status of the food after approx. 50% of the usual time..

VITESSE cooks faster...

The reason for this is the airtight seal of the pot, which ensures a slight overpressure inside and thus significantly speeds up the cooking process.

VITESSE cooks healthier

Gentle steaming in a closed system, which also uses significantly less liquid, preserves vitamins, minerals and the intrinsic flavour of the food.

Vitesse-steam-cooker-lid

Size	Art.-no.
ø 24 cm	614 2411

Stainless steel steamer insert (optional)

ø 19 x 5,5 cm	504 007000
---------------	------------

The Topics

- Cooking - pressure cooking
- steam cooking- Intuitive, easy handling, patented locking mechanism for opening and closing with one hand
- Specially developed break-proof glass lid for „sight cooking“- Time- and energy-saving preparation thanks to accelerated cooking process
- Gentle steam cooking preserves vitamins, vitamins, minerals and the inherent flavour of the food
- Thanks to patented valve technology, you can actively intervene in the cooking process at any time, for example to stir, season, top up or taste
- No boiling over thanks to the airtight lid

FRITACLEAN PAN LID

For all pots and pans ø 24-28 cm

- Suitable for all pots and pans with a diameter of 24 to 28 cm
- Integrated stainless steel permanent filter odours significantly
- Condensation is collected in the edge of the lid
- patented

Advantages at a glance:

- Clean cooking surface thanks to splash guard
- Frying odours are reduced to a minimum reduced to a minimum
- Crispy frying by collecting the condensation = no watering of fat and oil
- Easy to clean in the dishwasher, incl. filter
- Practical stand-up function

Fritaclean pan lid

Size	Art.-no.
24 - 28 cm	614 0010

COLANDER

space-saving, foldable

- Foldable colander for washing fruit, salad and vegetables
- Ideal as a steamer insert for cooking pasta and vegetables
- 3 feet guarantee a firm, wobble-free stand - The calculated number of holes allows water to drain quickly
- The colander is made of high-quality 18/10 stainless steel + food-safe silicone and is dishwasher-safe - Dimensions: ø 24/27 x 17 cm, folded only 6.5 cm high

- The rim shape corresponds to the nesto-cooking system, so the colander is safe to handle with the nesto handles
- The colander fits tightly on the 24 cm nesto pot, just like the 24 cm pot lid on the colander. Lid on the colander

THE HANDLE

A balancing act has been mastered with the patented handle. On the one hand, the handle can be operated effortlessly and intuitively with one hand, on the other hand, the leverage has the ideal strength to provide a perfect grip. The handle is attached to the outside of the pouring rim and does not protrude into the pot or pan.

Thus, all lids fit tightly!

nesto
handle

Secure connection

Wobble and slip resistant up to 10 kg

SILICONE-HANDLES

COOK[®]
VISION ITS NEW. nesto

Silicone-handle

Art. no. • 609 0300 blue

Art. no. • 619 0300 black

Heavy pans or pots can sometimes only be lifted with difficulty in using one arm.

In this case, you can simply attach a silicone handle on the opposite side of the long handle or use both silicone handles.

This way you can move heavy pots or pans comfortably with 2 hands.

Also ideal for pouring with the glass lid at an angle

The heat-resistant silicone handles are simply pushed onto the pouring rim.

SERVING

COOK[®]
VISION **ITS NEW.** nesto

EASY CLEANING

nesto
series

Our practical, magnetic coasters protect valuable kitchen surfaces from scratches and dents.

The silicone coaster ensures a firm, secure stand for all pans and pots.

Thanks to several integrated magnets, it sticks to the bottom of the cookware. At the same time, it serves as protection against scratches to the non-stick coating when storing pans stacked inside each other.
