6. Cardboard Coins "1"
7. Encounter Tokens
8. Multiplier Tokens
9. Oil Tokens
10. Food Tokens
11. Metal Tokens
12. Wood Tokens

Player Component Boxes

In these boxes all player components are stored. We suggest placing the airship after all the other components in the box.

The mech and character miniatures need to be orientated in a special way. See the information on the next pages.

Mech and Character Miniatures Placing

For **White**, **Orange**, **Green** and **Red** the following rules apply:

- The mechs should face each other.
- The mechs are placed first, then the character.
- The character is looking to the front.

There is one small exception for **Black**:

- The mechs are facing away from the character.

There is one small exception for **Purple**:

- Place the last mech after the character. The ape should be “sitting” between two mechs.

There is one small exception for **Blue**:

- The character is placed first, and this time sideways. Then place the mechs.

Component Storage #1

Place all components as shown.

- Place the game board first. If you have the big game board, place both boards first.
- Place the player mats like shown in the red circle.
- Place the faction mats on top of the game board, then place the token box and all card tiles on top of it.
- Place the big card box like shown.

Component Storage #1

Place the small card box, the power dials and all Player Component Boxes like shown. Afterwards place all instruction on top of it.
