

# Tinkering Paws

BOARD GAME INSERTS

## Terraforming Mars

## List of Contents

1. Five Card Boxes with lids and dividers
2. One 3<sup>rd</sup> Party Add-On Box
3. One Cardboard Token Box
4. Five Player Boxes with lids
5. Two Token & Credit Boxes with lids
6. One Cardboard Tiles Box

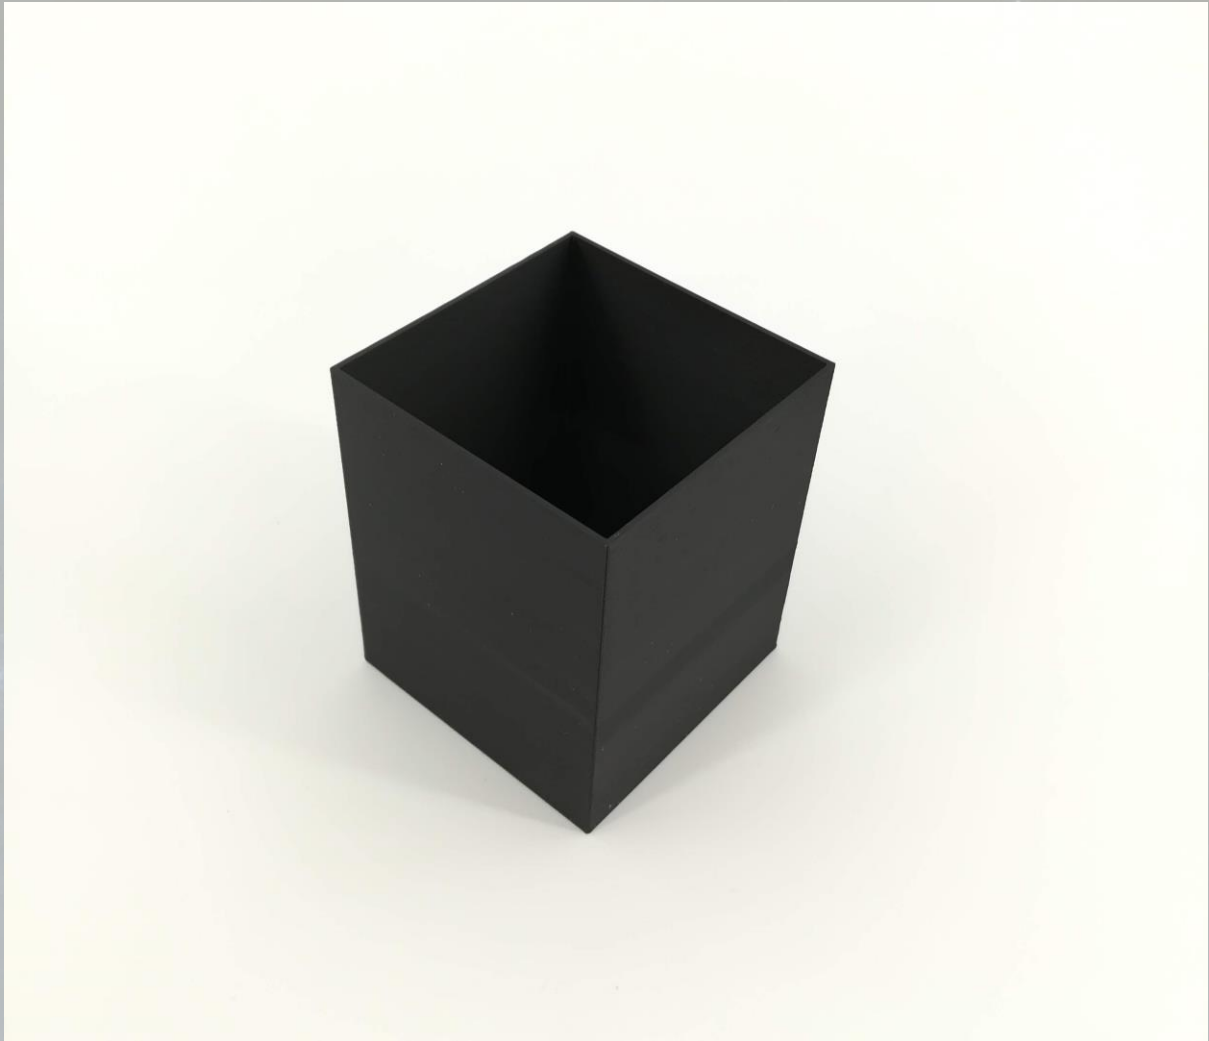

### **Card Boxes with lids and dividers**

These five card boxes are coming with lids and thirteen two-colored dividers. Please note, that the boxes are coming in two different heights – which is important when storing them in the game box.

There is no special rule for placing the cards in the boxes. Depending on how many expansions you own, if you use card sleeves (and which ones) and how you would like to organize the cards, there are countless possible ways to store the cards.

When you own all expansions and don't use card sleeves, you will need all three small boxes. With 60 microns card sleeves you will also need one of the big boxes and with 100 micron card sleeves you will need all five boxes.

### **3<sup>rd</sup> Party Add-On Box**

Countless 3<sup>rd</sup> Party add-ons are sold for Terraforming Mars (3D First Player Markers, 3D Trade Ships, Indicators, etc.). If you own any of these add-ons you can store them in this box. Or otherwise, if you have replaced some original components with 3<sup>rd</sup> Party add-ons (like our 3D-Astronauts) you can store the original components in this box.

Please note, that this box was not tested with any 3<sup>rd</sup> Party add-ons, so there is no guarantee that they will fit.

### Cardboard Token Box

The following cardboard tokens can be stored in this box:

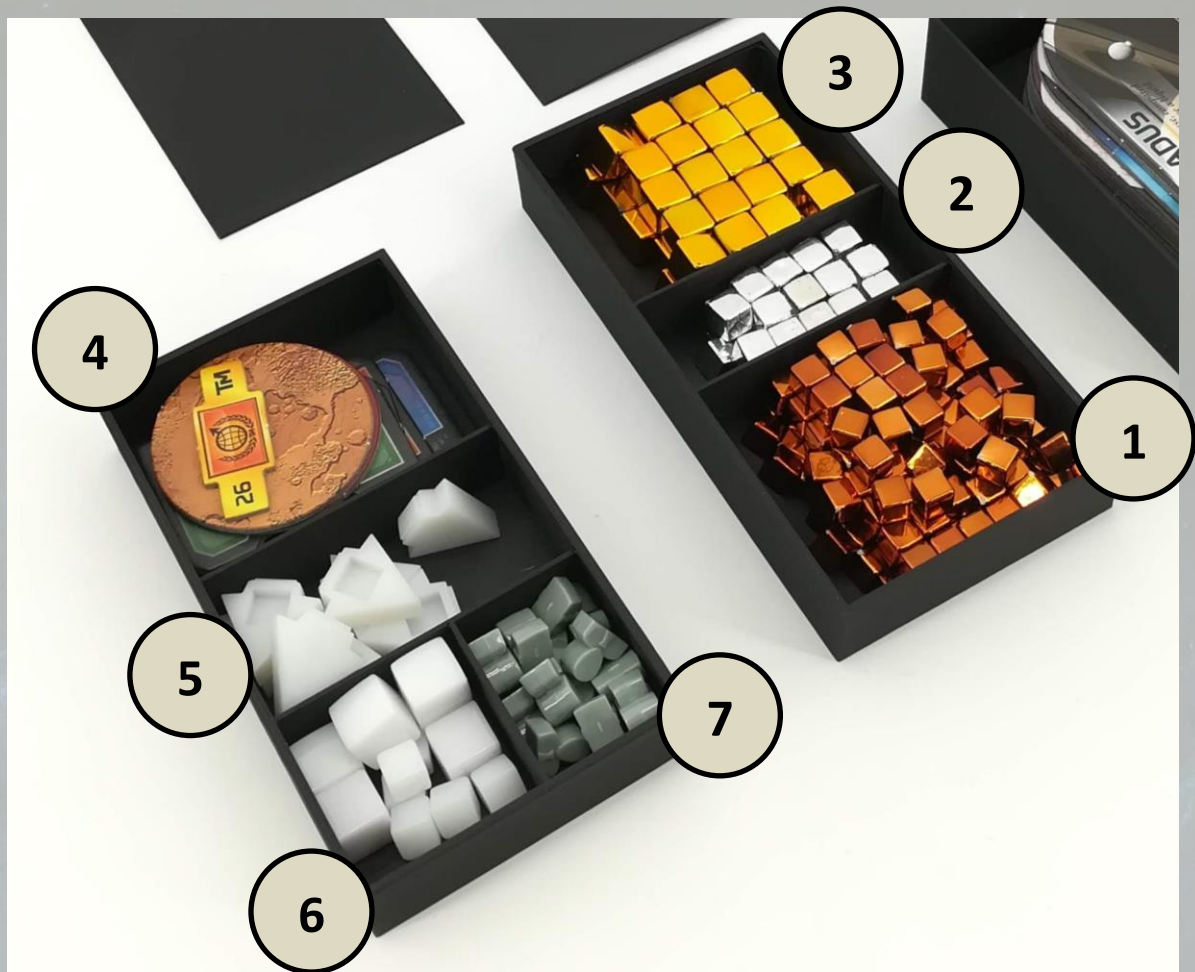

- All eleven Colony Tiles
- Colonies Reference Tile
- Hoverlord Milestone Tile
- Venuphile Award Tile

### **Player Boxes with lids**

Store the Player Markers in the big compartment and the delegates in the small one.

Please note, that one side of each compartment has a big rounded edge. This will help you, to remove the components from their compartment.

### Two Token & Credit Boxes with lids

Please note, that one side of some compartments has a big rounded edge. This will help you, to remove the components from their compartment. When you are sorting the Resource Cubes into the top box, please check the box for the correct orientation. The rounded edge is on the front side.

1. Copper Resource Cubes
2. Silver Resource Cubes
3. Gold Resource Cubes
4. Policy Tiles, Terraformer Milestone, First Player & Victory Point Token
5. Trade Fleets
6. Board Game Markers & Track Markers
7. Neutral Delegates

### **Cardboard Tiles Box**

Greenery/City Tiles will need four stacks, while Oceans and Special Tiles will each fit in one stack.

## **Component Storage Section**

The first part of the Component Storage Section assumes that you own all of the expansions including the Kickstarter-Exclusive Player Boards.

The other parts (starting on page 19) will show you, how to store components if you do not own all of the expansions. In any case, make sure to read the first part before proceeding.

## Component Storage Section – Part 1

### All Expansions

#### Component Storage #1

Place both Game Boards (Base Game and Hellas & Elysium) in the box. Make sure, they are touching the game box on two sides, leaving room on the other two sides.

## Component Storage #2

Place the following components as shown on top of the game boards

- Standard Player Boards
- Kickstarter Exclusive Player Boards
- Global Event Board
- Terraforming Committee Board
- Venus Board

### Component Storage #3

Place the Cardboard Token Box in the Corner, and place the Trade Fleets Tile next to it.

#### Component Storage #4

Place the Player Boxes on top of the Trade Fleets Tile

### **Component Storage #5**

Place the three smaller Card Boxes on top of the game board and the Cardboard Tiles Box next to the player boxes.

### Component Storage #6

Place the two big Card Boxes on the side like shown in the picture.

### Component Storage #8

Place the 3<sup>rd</sup> Party Add-On Box next to the two big Card Boxes and the Token & Credit Boxes in the remaining gap.

### Component Storage #9

Place the instruction on top and close the box.

Vertical Storage is possible.

## Component Storage Section – Part 2

### No Hellas & Elysium

#### Component Storage #1

If you are missing the Hellas & Elysium Game Board, placement of components will stay exactly the same. However, the lid of the game box is only partially supported –we suggest not placing anything on top of the box.

Vertical Storage is not possible.

## Component Storage #2

The instructions will fit exactly in the gap.

## Component Storage Section – Part 2

No Turmoil / No Colonies / No Venus Next

No Kickstarter-Exclusive Player Boards

### Component Storage #1

If you are missing any combination of the “big” expansions, or if you do not own the Kickstarter Exclusive Player Boards, simply change the position of the three small Card Boxes like shown in above image.

## Component Storage #2

Place the small instructions in the gap and the big instruction on top of everything. In this configuration, the lid of the game box is well supported.

However, vertical storage is not possible!
