

MOTORCYCLE LED H4 WIRE HARNESS

When using this H4 wireharness with a time delay relay:
 In some motorcycles, the combination of the H4 wiring and the time delay relay doesn't work properly. When you are experiencing electrical problems like the motorcycle not shutting off, please remove the middle pin from the relay, this should fix the problem.

1. CONNECT TO H4 HEADLIGHT FEED
2. CONNECT TO DRIVER OF LED PROJECTOR
3. CONNECT TO 12v+ SOURCE OF BATTERY

4. CONNECT TO GROUND/CHASSIS OF BIKE
5. CONNECT TO HIGH BEAM CONNECTOR OF LED PROJECTOR
